Brand Folder Guide

How to find the right Alok Plastics logo, every time

DOCUMENT VERSION	1.0
PREPARED FOR	Alok Plastics
PREPARED BY	Manhar Creatives
COVERS	Logos, Brand & Identity_Master Folder_Alok Plastics (114 files)
READ TIME	About 5 minutes
DATE OF ISSUE	1 October 2026

This guide explains the master folder **Logos, Brand & Identity_Master Folder_Alok Plastics**. It is written for anyone who needs the right logo quickly: an employee, a designer, a printer or an AI tool. Read Section 01 and you will have the answer in most cases.

01 The 10-second answer

Look at the **background** behind the logo, then pick a row. Every file below is inside the master folder.

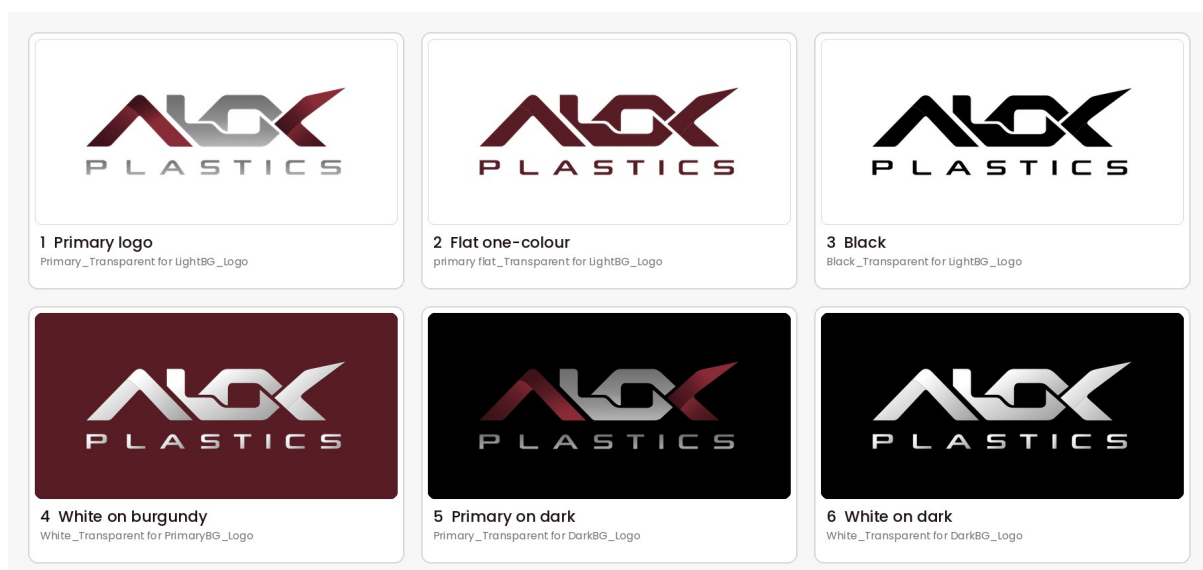

THE ONE RULE

Light background: **primary logo**. Burgundy background: **white logo**. Black or dark photo: **primary-on-dark logo**. Choose the file that says **Transparent** unless you need a ready-made square picture.

Background or job	Use this file	Folder
White or light background	Primary_Transparent for LightBG_Logo.png	02_Primary_Logos
Burgundy background (#581C25)	White_Transparent for PrimaryBG_Logo.png	02_Primary_Logos
Black or dark photo	Primary_Transparent for DarkBG_Logo.png	02_Primary_Logos
One colour only (stamp, newspaper ad)	Black_Transparent for LightBG_Logo.png	03_Transparent_Logos
Profile picture (WhatsApp, Instagram, LinkedIn)	512_512_DP_Primary_BGWhite.png	05_Icon_Only
Big print, or sending to a printer	Alok_Plastics_Logo_Vector_pdf.pdf	01_Logo_Master_Files

Shortcut: four of the most-used logos are also copied to the top level of the master folder: **Primary LightBG_Logo.png**, **Primary_Transparent for LightBG_Logo.png**, **White_PrimaryBG_Logo.png** and **White_Transparent for PrimaryBG_Logo.png**.

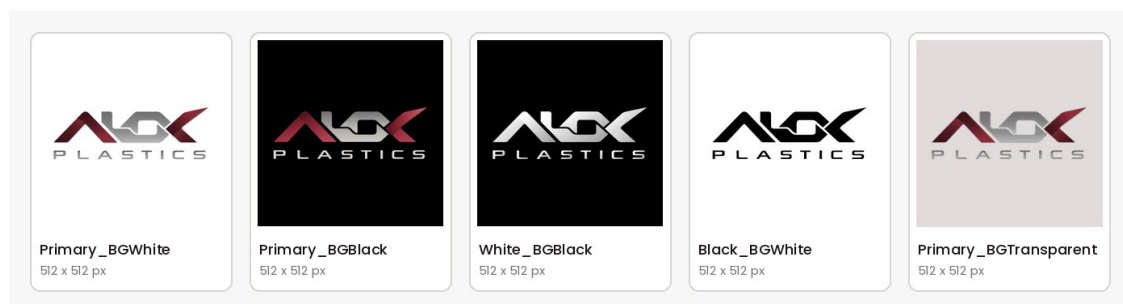

02 The logo family at a glance

Logos 1 to 3 are for light backgrounds, 4 for burgundy, 5 and 6 for dark backgrounds. The file names shown are exact.

03 Map of the folder

Folder	What is inside	Use it for
(top level)	4 PNG logos: quick copies of the most-used versions	Everyday use without searching
01_Logo_Master_Files	Original artwork: .ai (Illustrator), .cdr (CorelDRAW, plus a zipped copy), vector .pdf and .svg	Designers, printers and sign makers. Work on copies, never on the originals
02_Primary_Logos	The full-colour logo: 8 PNG versions, plus Primary_PDF and Primary_SVG sub-folders	Documents, social media, website
03_Transparent_Logos	Only the no-background versions (primary, flat, black, white), plus Transparent_SVG	Placing the logo on colours, photos, slides and Canva
04_Monochrome_Logos	One-colour black and white versions, plus Monochrome_PDF and Monochrome_SVG	One-colour printing, stamps, embossing
05_Icon_Only	Square profile-picture (DP) versions in 6 sizes (16 to 1080 px) and 5 styles, plus Icon_SVG	WhatsApp, Instagram and LinkedIn pictures, browser-tab and app icons
06	There is no folder 06. The numbering goes from 05 to 07	—
07_Wallpapers	4 JPG wallpapers: desktop and phone, light and dark	Company computers and phones
08_Linkedin Cover	LinkedIn company-page cover, 4200 × 700 px	LinkedIn page
09_Documentation	These guides	Learning how to use the brand

Inside 05_Icon_Only: square DP versions (512 × 512 px shown).

GOOD TO KNOW

The files in **05_Icon_Only** show the **full logo** centred in a square. They are not a separate symbol. At 16 to 48 px the word PLASTICS is too small to read.

04 How the files are named

Every logo file follows one pattern: **Style_Background_Logo.format**

WORKED EXAMPLE

Primary_Transparent for LightBG_Logo.png

Primary (full-colour logo) + **Transparent for LightBG** (no background, made for light backgrounds) + **Logo** + **.png** (file type)

Word in the file name	What it means
Primary	The main full-colour logo: burgundy and silver-grey
primary flat	One flat burgundy colour, no gradients. Good for simple printing
Black	Solid black, one colour
White	The white (white-to-silver) logo for burgundy or dark backgrounds
LightBG	Made for white or light backgrounds
DarkBG	Made for black or very dark backgrounds
PrimaryBG	Made for the brand burgundy background (#581C25)
Transparent for ...	No background colour at all. Sits cleanly on any surface of that type
No word "Transparent"	The file comes with its own background square (white, black or burgundy)
DP	Display picture: a square for profile pictures
512_512	Size in pixels (width_height). Sizes available: 16, 32, 48, 180, 512, 1080
BGWhite, BGBlack, BGTransparent	Background of the square picture
_PDF, _SVG folders	The same logo as vector files. Only the ending changes

Icon files use a second pattern: **Size_Size_DP_Style_Background.png**, for example

512_512_DP_Primary_BGWhite.png. Suggested sizes: 16, 32 and 48 px for browser tabs and small icons, 180 px for phone home screens, 512 px for WhatsApp and LinkedIn pictures, 1080 px for Instagram and sharper uses.

05 Which logo for which job

Job	Use this logo (exact file)	Why
Website and digital		
Website header on a light page	Primary_SVG/Primary_Transparent for LightBG_Logo.svg (in 02_Primary_Logos)	Sharp at every size
Website footer or burgundy banner	Primary_SVG/White_Transparent for PrimaryBG_Logo.svg (in 02_Primary_Logos)	Readable on burgundy
Browser tab and app icon	32_32_DP_Primary_BGWhite.png or 48_48_DP_Primary_BGWhite.png (in 05_Icon_Only)	Ready-made small squares
Email signature, Word, PowerPoint	Primary_Transparent for LightBG_Logo.png (in 02_Primary_Logos)	No white box; works in every Office app
Slide with a burgundy or dark background	White_Transparent for PrimaryBG_Logo.png or Primary_Transparent for DarkBG_Logo.png	Matches the background
Print		
Letterhead, invoice, quotation, catalogue pages	Primary_Transparent for LightBG_Logo.png (3000 px, high resolution)	Clean on white paper
Business card front (white) and back (burgundy)	Front: Primary_Transparent for LightBG_Logo.png . Back: White_Transparent for PrimaryBG_Logo.png	Right version for each side

Job	Use this logo (exact file)	Why
Catalogue or brochure cover in burgundy	White_Transparent for PrimaryBG_Logo.png	White stands out on burgundy
Product label, box, sticker (simple printing)	primary flat_Transparent for LightBG_Logo.png or Black_Transparent for LightBG_Logo.png	No gradients, so easy to print
Stamp, newspaper ad, engraving, embossing	Black_Transparent for LightBG_Logo.png (03 or 04) or Monochrome_PDF/Black_LightBG_Logo.pdf	Pure one colour
Flex, hoarding, shop board, vehicle	Vector files in 01_Logo_Master_Files: Alok_Plastics_Logo_Vector_pdf.pdf , Alok_Plastics_Logo_Vector.svg , or .ai / .cdr for the sign maker	Never enlarge a PNG
Uniform or bag printing	primary flat_... on light fabric, White_... on dark fabric. Confirm with the printer	Gradients are hard to reproduce
Social media and profile		
WhatsApp Business, Instagram, Facebook, LinkedIn picture	512_512_DP_Primary_BGWhite.png (or 1080_1080_DP_Primary_BGWhite.png for extra sharpness)	Square, centred, fits round frames
Post with a light design	Primary_Transparent for LightBG_Logo.png	Full colour on light
Post with a burgundy design	White_Transparent for PrimaryBG_Logo.png	White on burgundy
Post on a dark photo	Primary_Transparent for DarkBG_Logo.png . On a busy photo use White_Transparent for DarkBG_Logo.png	White is the most readable
LinkedIn company cover	08_Linkedin_Cover/Company_Page_LinkedIn_Cover_Page_Alok_Plastics.jpg	Ready to upload
Computer or phone wallpaper	Pick light or dark from 07_Wallpapers	Four ready files

06 Which file type

Type	Use it for
PNG	Screens, Word, PowerPoint, Canva, WhatsApp. The everyday choice
SVG	Websites and designers. Stays sharp at any size
PDF	Printers and vector printing
AI / CDR	Source files for designers (Illustrator, CorelDRAW). Edit copies only
JPG	Wallpapers and the LinkedIn cover, never for logos

07 Do and don't

Do	Don't
Pick the logo by looking at the background	Put the full-colour logo on burgundy: the burgundy parts disappear
Use Transparent files on colours, photos and slides	Use a LightBG file on a coloured page: a white box appears
Keep clear space around the logo, at least the height of the letter A in ALOK	Stretch, squeeze, rotate, recolour or add shadows and outlines
Keep it at least 25 mm wide in print or 120 px on screen	Enlarge a small PNG or icon. Use vector files instead
Work on copies of the master files	Redraw or retype the logo

08 Quick fixes

Problem	Usual cause	Fix
White box around the logo	A LightBG file was used on a coloured page	Switch to the Transparent file
Logo disappears on burgundy	The full-colour logo was used	Use White_Transparent for PrimaryBG_Logo.png
Logo looks blurry in print	A small PNG was enlarged	Use the PDF or SVG from 01_Logo_Master_Files
PLASTICS is unreadable	Logo is too small	Make it larger or use a DP square picture
Colours look different in print	Screen and print colours differ	Ask the printer for a proof before the full run
