REQUIREMENTS CHECKLIST

ALOK PLASTICS

alokplastics.com

What We Need From You

A short tick-list for the brand, website and admin system project

Companion to	SRS Document v1.0
Total items	37, grouped
Prepared For	Alok Plastics (CHD), Chandigarh
Prepared By	Manhar Creatives
Date	19 September 2026

Please return this completed checklist with all supporting files in one shared folder. It keeps the 2-3 week delivery on track.

How To Use This Checklist

This is the short companion to the **Alok Plastics SRS v1.0**. Everything Manhar Creatives needs from Alok Plastics in order to build the brand, the website and the admin panel is listed here in one place. Related items are grouped, so a single row may ask for several pieces of information.

Three simple steps

1. **Tick each row** as you gather the item.
2. **Put everything into one document and one shared folder** together with all files: product photographs, industry logos, facility videos, team photographs.
3. **Send it in one go**. Information arriving in scattered messages across several days is the most common cause of delay. One organised submission keeps the 2-3 week delivery on track.

Total items	37, grouped into 7 sections
Marked "First"	What we need before anything else can start
Where it goes	One shared folder, with edit access given to Manhar Creatives
If something is unavailable	Write "not available" rather than leaving it blank, so we know it is not pending
Questions	info@manharcreatives.com

You do not need to send: logo or logo variants, colours, fonts, brand guide, website text, product descriptions (we write them from your facts), blog articles, product visuals, the hero video edit, meta titles and descriptions, FAQ drafting, or the first drafts of the legal pages. All of that is created by Manhar Creatives.

A. Company & Brand

✓	#	What we need from you	What it is used for	When
	1	Company basics: registered name, entity type, year established, owner or founder name and designation	Logo, About page, legal pages, Google listing	First
	2	Brand statements: mission, vision and tagline (if you already have one)	About page, brand guide	First
	3	Core values (4 to 6) and the short keywords for the scrolling ribbon under the video	About page, landing page ribbon	First
	4	Company story: history, journey and key milestone years	About page timeline	Before design
	5	Culture and working environment notes	About page, Life at Alok Plastics	Before design
	6	What makes Alok Plastics different from other suppliers	Home, About, product pages	First
	7	Which industries you supply, and which cities or states you dispatch to	Industries section, local SEO	First
	8	Any existing printed material, visiting card or previous logo	Brand research	First

B. Products

Most important item on this list

Only **one catalogue** has reached us so far, and you have confirmed that more products exist.

Please send **every remaining catalogue, price list or product sheet**. The categories, the navigation dropdown and the filters are all designed around the full range. If the rest arrives after the design is approved, that structure has to be reworked. Adding products later through the admin panel always costs nothing; redesigning the structure later costs time.

✓	#	What we need from you	What it is used for	When
	9	All remaining product catalogues, or the full product list	Catalogue, categories, filters, navigation	First
	10	Which category each product belongs to, and whether our proposed category structure is correct	Products dropdown, filters	First
	11	Commercial details per product: price, unit (pc / set / kg), product code or SKU, HSN code, packing quantity, minimum order quantity	Product pages, invoicing	Before design
	12	Technical details per product: material and grade, sizes and variants, and which equipment the part fits	Specifications, filters, Google search	Before design
	13	Selling content per product: a short description, 3 to 6 key points, and build quality or reliability notes	Product pages, Google ranking	Before launch
	14	Real product photographs wherever you have them, and which products should appear on the home page	Product pages, home page	Before launch

C. Manufacturing, Delivery & Trust

This is what convinces a serious buyer, and it is also what Google and AI search engines read in order to recommend you.

✓	#	What we need from you	What it is used for	When
	15	How the parts are manufactured: process stage by stage, machines, equipment and technology used	Manufacturing section, hero video	Before design

✓	#	What we need from you	What it is used for	When
	16	How quality is checked before dispatch, and any certifications you hold	Manufacturing, trust content	Before design
	17	Your numbers: years of experience, industries served, cities served, products in range	Statistics band	First
	18	Delivery: full dispatch process, timelines after an order is confirmed, courier or transport partners, who pays freight, packing standard, and what happens if goods are damaged in transit	Delivery section, FAQ, refund policy	Before design
	19	15 to 20 industry or customer logos, with permission to display each one	Industries We Serve section	Before design
	20	Video clips or photographs of the factory, machines, production, packing and dispatch	Hero video, About page	First

About item 20: even phone-shot footage works. Real footage of your own facility is far more convincing than anything we can generate. If nothing is available, tell us in writing and we will build the video from representative visuals instead.

D. Contact & Digital Access

✓	#	What we need from you	What it is used for	When
	21	Business address exactly as it should appear on the website, plus any branch or additional operating location	Footer, contact page, Google listing	First
	22	Phone numbers for sales, careers and support (tell us if the same number serves all three)	Header, footer, contact, career	First
	23	WhatsApp Business number that should receive enquiries, and whether enquiries should be split by product category or region	WhatsApp button, enquiry handoff	First
	24	Email addresses: general, sales, careers and support	Contact form, footer, notifications	Before launch
	25	Social media links: LinkedIn, Instagram, Facebook and X (Twitter)	Footer	Before launch
	26	Business working hours	Contact page, Google listing	Before launch
	27	Account access: Hostinger login, domain login, and any existing Google Business Profile or Analytics account	Hosting, DNS and Google setup	First
	28	Bank or payment details to be shared with buyers on WhatsApp, and the greeting message you want sent after an enquiry arrives	Payment reply	Before launch

E. Career Section

✓	#	What we need from you	What it is used for	When
	29	Job openings to publish at launch with full descriptions, plus department, location, experience and employment type for each	Career page, job pages, filters	Before launch
	30	Your hiring process, step by step	Career page	Before launch
	31	Employee benefits and workplace highlights	Career page	Before launch
	32	Photographs for the Life at Alok Plastics section, and the common questions candidates ask you	Career page, Career FAQ	Before launch

F. Policies & FAQ

✓	#	What we need from you	What it is used for	When
	33	Review and approve the Terms & Conditions, Privacy Policy and Refund Policy that we draft and send you, including your refund conditions and timelines	Legal pages	Before launch
	34	Company FAQ: the questions buyers actually ask you	FAQ sections	Before launch

Legal pages: Manhar Creatives drafts all three and sends them for your review. You only need to read them, correct anything that does not match how you actually work, and approve. We are not legal advisors, so please have the final text checked by your own advisor before it goes live.

G. Three Decisions We Need From You

These are not documents to collect. They are three choices only Alok Plastics can make, and each one blocks a part of the build until it is answered.

✓	#	The decision	Explained in	When we need it
	35	Hosting plan. Your current Hostinger Premium plan cannot run the type of website we are building. Confirm whether to upgrade the Hostinger plan, or to run the website elsewhere while keeping the domain, email and database on Hostinger.	SRS Section 11.2	First
	36	OTP route. Buyers log in with a phone number and OTP. Choose SMS (needs a government DLT registration in your company name, plus a small per-message cost) or WhatsApp OTP (no DLT, but needs a WhatsApp Business API account).	SRS Section 7.3	First
	37	Enquiry message and buyer details. Approve the WhatsApp message format we have proposed, and confirm the list of details we ask a buyer for before their enquiry is sent. Every extra compulsory field reduces the number of completed enquiries, so keep it short.	SRS Sections 7.4.1 and 7.5.1	Before design

H. What Happens After You Send This

Step	Stage	What happens
1	Advance + checklist received	The 2-3 week delivery clock starts on this date
2	Days 1 to 4	Brand identity: three logo directions shown to you on real mockups. You approve one.
3	Days 4 to 15	Design and development run together: website, product catalogue, enquiry flow, OTP, WhatsApp handoff and admin panel. A working preview link is shared for your review. You approve it.
4	Alongside	Hero video, product visuals, website copy, five blog articles, SEO setup
5	Final days	Hosting, Cloudflare, email, Google setup, testing, go live, handover walkthrough
6	Next 2 weeks	Any change inside the agreed scope, at no extra cost

Please note

We need your answer on each approval step within **2 working days**. If an approval or a piece of content is delayed, the delivery date moves by the same number of days, because every later stage depends on the one before it.

We will confirm any revised delivery date in writing as soon as that happens.
