Version	Date	Description	Author
1.0	19 Sep 2026	Initial draft prepared after client discovery and requirement discussion	Manhar Creatives

Note to Client

This document is based on the requirement discussions conducted between **Manhar Creatives** and **Alok Plastics (CHD)**. It records the agreed scope of work for the brand identity, business website, enquiry system and product admin panel.

Any addition, change or correction should be communicated in writing so that this document can be updated and re-issued as a new version. Once approved, this SRS becomes the binding scope reference for the entire engagement.

Items marked "**Information required from client**" are open points. Development of the sections that depend on them cannot begin until that information is received.

1. Introduction

1.1 Purpose of This Document

This Software Requirements Specification (SRS) defines the complete functional, design, technical and non-functional requirements for the creation of a new brand identity, a new business website and a product & enquiry administration panel for **Alok Plastics (CHD)**, accessible at **alokplastics.com**.

The document serves as a single, binding reference between the client (Alok Plastics) and the development studio (Manhar Creatives), establishing a shared and unambiguous understanding of what will be delivered, what the client must supply, what is excluded, and how changes will be handled.

1.2 Project Background

Alok Plastics manufactures and supplies spare parts and components for **water coolers, display counters and deep freezers**. The company operates from Industrial Area Phase-2, Ramdarbar, Chandigarh, and already holds an existing product catalogue covering items such as adjustable leg inserts, F-bush, ventilation jalli, connecting bush, handle locks, bracket handles, float valves, waste pipes, push cocks, door locks, waste coupling, hinges, gaskets, door springs, PUF chemical and related components.

The client already owns the domain **alokplastics.com** and an active **Hostinger** subscription, on which a basic WordPress website is currently running. That existing website is limited to direct product photographs with very little structured product information, and is not performing as a professional business website or as a lead-generation asset.

The catalogue supplied so far covers only a part of the company's range. Alok Plastics has confirmed that further products exist which have not yet been shared. The website, the database and the admin panel are therefore designed to carry the **complete and growing range**, not only the items known today.

The requirement is therefore a **complete digital rebuild from scratch**: research, brand identity, design direction, website design and development, technical and server setup, Google ecosystem setup, SEO, security, and an admin panel through which the company can manage its own products, enquiries and career listings.

1.3 Project Scope

The following work is **included** in this engagement:

- **Research**: business, product, competitor and keyword research for the spare-parts B2B segment
- **Brand identity creation**: logo design presented through real-world mockups, logo variants, colour palette, typography, iconography and a brand usage guide
- **Theme and visual direction**: a premium, industrial, dark-themed design language selected and approved by the client before development begins
- **Website UI/UX design**: complete page-wise design for every page listed in Section 4, across desktop, tablet and mobile
- **Front-end and back-end development** in Next.js, including a dynamic, database-driven product catalogue built to carry the complete and growing product range
- **Enquiry-to-WhatsApp journey**: quantity selection, add-to-cart, phone-number + OTP login, guided profile capture, and an automatically formatted WhatsApp enquiry message
- **Admin panel**: product, category, media, enquiry-status, career and content management
- **Database and data flow setup**, including a parallel record of every enquiry in a Google Sheet
- **DNS setup on Cloudflare** and full utilisation of the client's existing Hostinger subscription
- **Google ecosystem setup**: Google Business Profile, Google Maps, Google Analytics 4, Google Search Console and Google Tag Manager
- **On-page and technical SEO foundation**, including schema markup and sitemap
- **Five SEO-optimised blog articles** with supporting blog architecture

- **Hero video production** for the landing page and **AI-generated product/section imagery** where required
- **Website security implementation**, SSL and backup configuration
- **Legal pages:** Terms & Conditions, Privacy Policy and Refund Policy
- **Testing, deployment, handover and a two-week post-delivery change window**

Items explicitly outside this scope are listed in **Section 17: Project Exclusions**.

1.4 Intended Audience

- **Client:** Alok Plastics (CHD), for review, clarification and written approval
- **Development studio:** Manhar Creatives, as the primary implementation reference
- **Stakeholders:** management, sales and hiring personnel of both parties who will operate or evaluate the delivered system

1.5 Definitions and Abbreviations

Term	Definition
SRS	Software Requirements Specification (this document)
UI / UX	User Interface / User Experience
CTA	Call-To-Action, a button or link that prompts the visitor to act
SEO	Search Engine Optimization
SKU	Stock Keeping Unit, a unique product/variant code
PDP	Product Detail Page
PLP	Product Listing Page (category or all-products page)
OTP	One-Time Password used for phone-number verification
DLT	Distributed Ledger Technology: TRAI-mandated registration for SMS sender IDs and templates in India
CMS	Content Management System
CRUD	Create, Read, Update and Delete, the four basic data operations
SSR	Server-Side Rendering
GA4 / GSC / GTM	Google Analytics 4 / Google Search Console / Google Tag Manager
GBP	Google Business Profile
GSTIN	Goods and Services Tax Identification Number
WCAG	Web Content Accessibility Guidelines
UAT	User Acceptance Testing
MoM	Minutes of Meeting

1.6 Source Documents

This SRS is written against the following source material. Where the two conflict, this SRS prevails for scope and the client catalogue prevails for product facts.

Source	Use in this project
Alok Plastics Product Catalogue (client-supplied PDF)	Primary source of truth for product names, materials, sizes and prices
Alok Plastics Website & Admin System	Commercial scope, module breakdown and payment terms

Source	Use in this project
Quotation by Manhar Creatives	
Client requirement discussions	Functional behaviour, journey design and design preferences
Existing website: alokplastics.com	Baseline assessment and content migration reference

2. Overall Description

2.1 Client Overview

Alok Plastics (CHD) supplies spare parts and components used in the manufacture, assembly and servicing of water coolers, display counters and deep freezers. The product range spans moulded plastic components (HDPE, PPCP, Nylon), brass fittings, stainless-steel hardware and chemical consumables.

Information required from client: company registration name, year of establishment, founder/owner name, factory and office details, number of employees, production capability, machinery and processes used, and any certifications held. These are needed for the About page, the statistics band and the manufacturing-process section. Manhar Creatives will not publish any claim that the client has not supplied in writing.

2.2 Product Portfolio (Partial Range Received)

One product catalogue has been received from the client to date. **It is not the full product range.** The client has confirmed that further products exist which have not yet been shared, and additional catalogues or product lists are expected.

The range received so far covers roughly twenty line items across moulded plastic components (HDPE, PPCP and Nylon), brass fittings, stainless-steel hardware and chemical consumables: leg inserts and bushes, ventilation jalli, handles and locks, float valves, push cocks, waste pipes and couplings, hinges, kabja, door springs, gaskets and PUF chemical. The complete extract, with materials, sizes and prices exactly as printed in the client catalogue, is reproduced in **Appendix A**.

Remaining Product Range

The **full product list has not yet been received**. Alok Plastics is requested to share every remaining catalogue, price list or product sheet in one submission, so that the category structure, filters and navigation are designed around the complete range rather than around a part of it.

The system carries no limit on the number of products or categories, and products that arrive after launch are added by the client through the admin panel. However, categories and filters defined before the full range is known may need restructuring later. Receiving the complete list **before the design phase** avoids that rework.

Information required from client: for every product, full description, key selling points, build quality and reliability notes, application and compatibility details, packing quantity, minimum order quantity, HSN code and SKU code, plus the prices that are missing or outdated in the current catalogue.

2.3 Existing Digital Assessment

Area	Current position	Action in this project
Domain	alokplastics.com, owned by client	Retained; DNS moved to Cloudflare
Hosting	Hostinger subscription held by client	Fully utilised; plan suitability addressed in Section 11.2
Platform	Basic WordPress website	Replaced by a purpose-built Next.js application
Content	Mostly direct product photographs, minimal text	Replaced with structured, SEO-ready product data
Product pages	No individual product pages	Category pages + individual product pages

Area	Current position	Action in this project
		generated from the database
Lead capture	No structured enquiry mechanism	Cart-based enquiry, OTP login and WhatsApp handoff
Brand identity	No consistent identity system	Complete identity designed from scratch
Search presence	Limited organic visibility	Technical SEO, on-page SEO and local SEO foundation
Admin control	None	Full product, enquiry and career admin panel

2.4 Target Market

The website is a **business-to-business** asset. Its content, tone, imagery and calls-to-action must address buyers who purchase in quantity and who evaluate a supplier on range, consistency, price and dispatch reliability rather than on retail-style browsing.

Segment	Who they are	What they need from the site
OEM manufacturers	Water cooler, display counter and deep freezer manufacturers	Consistent supply, bulk pricing, specification clarity
Fabricators & assemblers	Workshops assembling cabinets and counters	Correct sizes, material, immediate availability
Dealers & distributors	Regional hardware and cooling-parts traders	Full range in one place, dealer pricing enquiry
Service technicians	Repair and AMC technicians	Fast part identification, small-quantity purchase
Retail spare-part shops	Local counter shops	Catalogue clarity, price visibility, quick reorder

2.4.1 Geographic Focus

- **Primary:** Chandigarh, Mohali, Panchkula and the Tricity industrial belt
- **Secondary:** Punjab, Haryana, Himachal Pradesh and Delhi NCR
- **Tertiary:** pan-India enquiries received through organic search and WhatsApp

Information required from client: confirmation of the states/cities actively served, whether dispatch is pan-India, and whether any export enquiries are entertained. This directly determines the local SEO and "Cities We Serve" content.

2.5 User Classes

User class	Description	Primary goals on the system
Trade Buyer (guest)	Unregistered visitor browsing the catalogue	Find the right part, check price, build a cart
Trade Buyer (verified)	Buyer verified by phone OTP with a saved profile	Send an enquiry, reuse saved details, reorder
Job Applicant	Candidate visiting the Career section	Find an opening, read about the workplace, apply with resume
Admin User	Alok Plastics staff operating the admin panel	Manage products, update enquiry status, manage jobs
Search Engine Crawler	Google, Bing and other search engines	Read and understand structured

User class	Description	Primary goals on the system
		business and product data

2.6 Brand Positioning Inputs

The following brand fundamentals are required from the client before the identity and copy work can be finalised. Manhar Creatives will assist in drafting and refining them, but the final wording must be approved by Alok Plastics.

Input	Why it is needed	Status
Registered company name	Logo lockup, legal pages, schema markup	Information required from client
Mission statement	About page, brand guide	Information required from client
Vision statement	About page, brand guide	Information required from client
Core values (4-6)	About page + landing-page scrolling ribbon	Information required from client
Tagline (if one exists)	Logo lockup, footer, meta titles	Information required from client
Unique selling propositions	Home, About and product pages	Information required from client
History, journey & culture	About page timeline, Life at Alok Plastics	Information required from client
Manufacturing process & machinery	Manufacturing section, credibility content	Information required from client
Business numbers / statistics	Statistics band on Home and About	Information required from client

Source-of-Truth Rule

Manhar Creatives will **not invent** product specifications, materials, certifications, manufacturing capability, production capacity, years of experience, client lists, geographic coverage or any other business claim.

Wherever information has not been supplied by the client, the corresponding section will be built with a clearly marked placeholder and the page will not be published with fabricated content.

2.7 Assumptions & Constraints

Assumptions

1. The client owns, and will retain, the domain **alokplastics.com** and the Hostinger subscription for the full duration of the project and beyond.
2. The client will provide a single authorised point of contact for approvals, feedback and content handover.
3. The client will supply all content listed in Section 16 within the agreed window; the timeline is measured from the date the advance payment and that content are both received.
4. Prices shown on the website are indicative trade pricing; final commercial negotiation happens on WhatsApp and is outside the system.
5. Payment collection is handled manually by Alok Plastics outside the website. No payment gateway is integrated.
6. The client will provide, or approve the purchase of, any third-party service required for OTP delivery and WhatsApp messaging (Sections 11.7 and 11.8).
7. Website content will be published in **English** only.

Constraints

1. The site must be built on **Next.js**, as agreed with the client, with DNS operated through **Cloudflare**.

2. The existing Hostinger subscription must be utilised; hosting is not moved for convenience alone, and any plan limitation is documented and escalated rather than silently replaced (Section 11.2).
3. The visual theme must be **dark**, premium and industrial: explicitly not "techy", not template-like and not visibly AI-generated.
4. No AI chatbot is to be implemented; the client has declined this feature.
5. No full CRM, sales pipeline, inventory or accounting module is to be built.

3. Design System & Brand Identity Requirements

3.1 Creation Responsibility

Alok Plastics has no existing brand identity system. Manhar Creatives shall create the complete identity from scratch, comprising:

- Primary logo, secondary/horizontal logo, icon-only mark and favicon variants
- Complete colour palette: primary, secondary, accent, neutral and state colours with HEX, RGB and CMYK values
- Typography system: display, heading, body and UI type with weights and usage rules
- Iconography style and a base icon set for products, values and process steps
- Photography and product-visual direction
- Graphic elements: dividers, badges, patterns, section motifs
- A digital **Brand Style Guide** documenting correct and incorrect usage
- Complete logo file package: AI/SVG/EPS/PNG/JPG/PDF, light and dark versions

3.2 Brand Identity Workflow

1. Brand discovery: market, competitor and positioning research for the spare-parts segment.
2. Multiple creative directions are explored internally; **three refined directions** are presented to the client.
3. Each direction is presented on **real-world mockups** (signage, packaging label, letterhead, business card, product sticker, website header) so the client evaluates the logo in context rather than in isolation.
4. The client selects one direction. Up to **two rounds of refinement** are carried out on the selected direction, within the approved scope.
5. The final identity (logo, palette, typography and style guide) is signed off in writing.
6. **No website design work begins before the identity is approved.** The identity drives the design system, and the design system drives the build.

Why the order matters

Every downstream module depends on the approved identity. If the logo, palette or type changes after design or development has started, the change affects the entire site, the admin panel and all product visuals. Sign-off at this gate protects both the timeline and the budget.

3.3 Theme Approach

- The website shall use a **dark theme** as the default and only theme. No light-mode toggle is in scope.
- The visual language must read as **premium industrial B2B**: confident, engineered, material-led. It must not read as a technology/SaaS website, a startup landing page, or a generic template.

- Depth is created with material contrast, real product photography treatment, precise grids and restrained motion, not with neon glows, gradient meshes or "techy" effects.
- Generous whitespace (dark space), strong typographic hierarchy and consistent 8-point spacing across all breakpoints.

3.3.1 Anti-Generic Design Mandate

The client has specifically stated that the website must not look AI-generated or generic. The following are therefore treated as **hard design requirements**, not preferences:

- No stock-template hero layouts, no generic three-icon feature rows, no unmodified library components
- No filler copy; every line of text is written for Alok Plastics and its buyers
- Product imagery must be treated to a single consistent studio look, uniform background, lighting, angle and shadow across the entire catalogue
- A custom grid, custom section rhythm and a distinctive type pairing that is carried through every page
- Micro-interactions (hover, focus, reveal) designed specifically for this site rather than inherited from a framework default

3.4 Colour Palette

The palette will be finalised during the identity phase and presented with the three creative directions. The client has suggested a **dark base with a minimal green accent** as a starting reference; this is treated as a direction to explore, not a decision. Once approved, the site shall follow a 60-30-10 composition.

Role	Share	Status	Application
Base / Primary	60%	To be finalised	Page backgrounds, large surfaces, hero
Secondary	30%	To be finalised	Cards, panels, section bands, borders
Accent	10%	To be finalised	CTAs, active states, highlights, icons, links
Neutrals	Not stated	To be finalised	Body text, muted text, dividers, disabled states
State colours	Not stated	To be finalised	Success, warning, error, info (forms and admin panel)

Contrast requirement: every final colour pair used for text on a dark surface must meet a minimum contrast ratio of **4.5:1** for body text and **3:1** for large text and interactive borders, so that the dark theme remains readable on low-brightness mobile screens and in daylight.

3.5 Typography

The final type system is selected during the identity phase. The following is the proposed starting stack and may be adjusted on approval.

Role	Proposed	Notes
Display / H1-H2	Geometric or grotesque sans with strong weight range	Sets the industrial, engineered tone
Body / UI	Highly legible humanist sans	Minimum 16px on all devices
Numerals / Specs	Tabular figures	Used in spec tables and price displays
Fallback	System UI stack	Guarantees render if a web font fails to load

- Web fonts shall be self-hosted or served with `font-display: swap` to protect page-load performance
- A maximum of two type families (plus a monospace/numeric variant) across the entire site

3.6 Visual Style & Motion

- Scroll-reveal animations on sections, statistics counters and process steps, subtle, single-direction, never bouncing
- Hover states on cards, product tiles and buttons with a consistent easing curve throughout the site
- The values ribbon under the hero animates as a continuous horizontal marquee (Section 5.6)
- All motion respects the `prefers-reduced-motion` setting and is simplified or disabled on mobile for performance
- No parallax-heavy or scroll-jacking behaviour that interferes with normal reading

3.7 Design Deliverables

Deliverable	Format
Three refined logo directions on real-world mockups	PDF / PNG presentation
Final logo package	AI, SVG, EPS, PDF, PNG (transparent), JPG: light & dark
Brand style guide	PDF
Colour palette sheet	HEX / RGB / CMYK

4. Information Architecture

4.1 Navigation Model

The main navigation bar shall contain five items. Labels may be adjusted at design stage with client approval.

#	Nav item	Behaviour
1	Home	Links to the landing page; the logo also links here
2	About	Company, journey, culture, manufacturing, numbers
3	Products	Dropdown listing every product category; each category is directly clickable. A "View All Products" link sits at the end of the dropdown
4	Career	Job listings, Life at Alok Plastics, application forms
5	Contact	Contact details, map, enquiry form

- A persistent, fixed header on all pages with a condensed state on scroll
- A cart/enquiry indicator showing the current item count, visible in the header on all pages
- A global search entry point in the header (opens product search)
- On tablet and mobile the navigation collapses to a hamburger drawer; the Products dropdown becomes an expandable accordion

4.2 Sitemap

Pages marked **(nav)** appear in the main navigation. All other pages are reachable from the footer, from in-page links or from search.

Page	Type	Reached from
Home	(nav) Static	Navigation, logo
About	(nav) Static	Navigation, footer
All Products	(nav) Listing	Navigation, dropdown, footer
Product Category	Listing (dynamic)	Products dropdown, all-products page, search
Product Detail	Detail (dynamic)	Category page, search, related products
Cart / Enquiry Basket	Functional	Header cart icon, product pages
Login & Profile Capture	Functional	Triggered at add-to-cart / enquiry submission
Enquiry Confirmation	Functional	After WhatsApp handoff
Career	(nav) Listing	Navigation, footer
Job Detail	Detail (dynamic)	Career page, career search
Contact	(nav) Static	Navigation, footer, all CTAs
Blog Listing	Listing	Footer, internal links
Blog Article × 5	Detail	Blog listing, search engines, internal links
Search Results	Functional	Header search
Terms & Conditions	Legal	Footer
Privacy Policy	Legal	Footer
Refund / Return Policy	Legal	Footer

Page	Type	Reached from
404 / Not Found	System	Broken or mistyped URLs

4.3 URL Structure

Clean, lowercase, hyphenated, keyword-relevant URLs shall be used throughout. No query-string URLs for indexable content.

```
alokplastics.com/
alokplastics.com/about
alokplastics.com/products
alokplastics.com/products/<category-slug>
alokplastics.com/products/<category-slug>/<product-slug>
alokplastics.com/cart
alokplastics.com/career
alokplastics.com/career/<job-slug>
alokplastics.com/contact
alokplastics.com/blog
alokplastics.com/blog/<article-slug>
alokplastics.com/terms-and-conditions
alokplastics.com/privacy-policy
alokplastics.com/refund-policy
```

- Slugs are generated from the product/category name and remain editable in the admin panel
- Changing a published slug automatically creates a 301 redirect from the old URL so search rankings and shared links are not lost

4.4 Proposed Product Categories

The following category structure is proposed based on the client catalogue. Final categories, names and product-to-category mapping require client confirmation.

#	Proposed category	Indicative products
1	Water Cooler Spare Parts	Float valve, push cocks, waste pipe, waste coupling, three core plug
2	Display Counter Spare Parts	F-bush, ventilation jalli, connecting bush, bracket handle
3	Deep Freezer Spare Parts	Door lock, gasket, hinges, door springs
4	Hinges, Kabja & Springs	L-type hinges, SS Kabja 202, U-type door spring, L-hinge door spring
5	Locks, Handles & Hardware	Handle lock, door lock (big/small), bracket handle, bright chrome
6	Fittings, Bushes & Legs	Adjustable leg insert, connecting bush (brass/plastic), F-bush
7	Chemicals & Consumables	PUF chemical (polyol & isocyanate), gaskets

These categories are provisional. They are derived from the one catalogue received so far. Once the remaining products are shared, the category structure will be reviewed and finalised with the client before design work begins.

A single product may belong to more than one category (for example, a hinge used in both display counters and deep freezers). The system shall support **multi-category assignment** so that the same product appears wherever a buyer expects to find it, without duplicating the product record.

4.5 Page Count Estimate

The following is an approximate count of the work involved. "Unique templates" is the number of screens that must be individually designed; "rendered pages" is the number of live URLs the site will publish at launch.

Area	Unique templates	Rendered pages at launch
Home	1	1
About	1	1
Products, all products listing	1	1
Product category listing	1	7 (one per category)
Product detail	1	~20 at present; one per product received
Cart / enquiry basket	1	1
Login + profile capture flow	2	2
Enquiry confirmation / thank-you	1	1
Search results	1	1
Career listing	1	1
Job detail + apply	1	Per opening published
Contact	1	1
Blog listing	1	1
Blog article	1	5
Legal pages (T&C, Privacy, Refund)	1	3
404 / error	1	1
Website sub-total	16 templates	~47 live URLs
Admin panel screens	12	12
Project total	28 screens	~59

This estimate is based on the one catalogue received to date. The live URL count will rise as the remaining products are shared. Because product and category pages are template-driven, this growth adds pages without adding development cost or development time.

Product and category pages are **template-driven**. Once the templates are built, every new product the client adds through the admin panel automatically publishes a new fully-formed, SEO-ready page. The page count therefore grows with the catalogue at no additional development cost.

5. Global / Sitewide Requirements

5.1 Header

- Fixed, always-visible header with the Alok Plastics logo at the left

- Navigation: Home, About, Products (dropdown), Career, Contact
- Right side: search icon, cart/enquiry icon with live item count, and a primary CTA button (label to be finalised: e.g. "Get a Quote")
- Condensed header height and increased background opacity after the first scroll step
- Active page indicated with the accent colour
- Fully keyboard-navigable, with a visible focus ring

5.2 Products Dropdown

- Opens on hover (desktop) and on click/tap (touch devices)
- Lists every active product category, driven by the database; a category added in the admin panel appears here automatically
- Each category row may show a small category icon or representative product thumbnail
- A "View All Products" link closes the list
- On mobile the dropdown becomes an expandable accordion inside the navigation drawer

5.3 Footer

A single consistent footer on every page containing:

- Logo, one-line company description and (if supplied) the tagline
- Quick links: Home, About, Products, Career, Contact, Blog
- Product categories list
- Contact block: address, phone number(s), email address(es), business hours
- Social media icons: LinkedIn, Instagram, Facebook, X (Twitter)
- Legal links: Terms & Conditions, Privacy Policy, Refund Policy
- Copyright line with the current year
- **"Made by Manhar Creatives"** credit with a link to manharcreatives.com: agreed to by the client

5.4 Floating WhatsApp Button

- A WhatsApp icon fixed at the **bottom-right corner of every page**, on every device
- Remains visible at all scroll positions and does not obstruct primary content or the cart button
- Opens a WhatsApp chat with the business number, pre-filled with a context message (for example, the product name when opened from a product page)
- Click events tracked in GA4 as a conversion

5.5 Global CTA Band

Every content page ends, above the footer, with a standard conversion band containing a headline, a short supporting line and two actions: a primary enquiry action and a WhatsApp/call action.

5.6 Values Ribbon (Landing Page)

- A continuously scrolling horizontal ribbon placed **directly below the hero video**
- Displays the company's core values as short keywords separated by a brand divider mark
- Pauses on hover; direction and speed tuned so the text remains readable
- Duplicated content is hidden from assistive technology so screen readers announce the values only once

Information required from client: the exact value keywords for this ribbon (4-8 short words or two-word phrases). Manhar Creatives can propose options, but the final wording must be confirmed by Alok Plastics because these words also appear on the About page and in the brand guide.

5.7 Industries We Serve

- A logo-only section with **no descriptive text, no cards, no counters**, as specified by the client

- Displays 15-20 client/industry logos in a uniform monochrome or single-tone treatment so that mismatched source files still look consistent
- Presented as a responsive grid on desktop and a scrolling strip on mobile
- Logos are supplied by the client and placed during the build

Information required from client: 15-20 industry/customer logos in PNG or SVG (transparent background preferred), together with written confirmation that Alok Plastics is permitted to display each logo on its website.

5.8 Site Search

- Accessible from the header on every page
- Searches product name, category, material, size/variant and product code
- Shows suggestions as the visitor types, with a thumbnail and price
- Handles misspellings and partial matches; returns a helpful empty state with category shortcuts when nothing matches

5.9 System Pages & States

State	Requirement
404 Not Found	Branded page with search box and links to top categories
Empty cart	Illustration, one line of guidance, and a button back to Products
No search results	Suggested categories and a "send us an enquiry" prompt
Form validation error	Inline, field-level message in plain English, never a generic alert
OTP failure	Clear reason, retry counter and a fallback WhatsApp contact option
Loading	Skeleton placeholders on listing and detail pages, not a blank screen
Offline / network error	Friendly message with a retry action

5.10 Cookie & Consent Notice

- A first-visit notice explaining cookie and analytics usage, with accept and decline actions
- Analytics scripts fire only after consent where the visitor declines tracking
- The notice links to the Privacy Policy

5.11 Excluded Global Feature

No AI Chatbot

The client has confirmed that an AI chatbot is **not required**. No chatbot widget, conversational assistant or automated chat interface will be implemented. The floating WhatsApp button is the designated real-time contact channel.

6. Page-Level Requirements

This section specifies each page section by section, in the order the visitor encounters it. Every page ends with the global CTA band (Section 5.5) and the global footer (Section 5.3) unless stated otherwise.

6.1 Page 1: Home / Landing Page

6.1.1 Hero Section: Video

- A **full-viewport hero with a background video** as the first thing the visitor sees
- The video shall portray the company journey, from raw material and manufacturing through finishing, quality check, packing and dispatch/execution
- Treatment must be cinematic and professional: steady framing, controlled colour grade, no stock-footage collage feel
- Overlaid content: headline, one supporting sentence, and two CTAs: primary "Explore Products", secondary "Get a Quote" or "WhatsApp Us"
- A dark gradient overlay guarantees text contrast over any frame of the video
- Video is muted, auto-playing, looping and `playsinline`; a poster image displays until the video is ready
- On mobile and on slow connections the video is replaced by an optimised still image to protect load time and data usage
- The video file is compressed and served in modern formats; it must not block the first paint of the page

Video production specification, sourcing and client responsibilities are detailed in **Section 12.1**.

6.1.2 Page Sections, in Order

Every section below sits on the home page in this sequence, beneath the hero.

#	Section	Requirement
1	Values ribbon	Continuously scrolling marquee of the core value keywords, placed directly beneath the hero video (Section 5.6)
2	Who we are	Short company introduction, a supporting visual, and a link through to the About page
3	Product categories	Grid of all categories with image, name and product count; each card links to its category page, with a "View all products" action below
4	Featured products	Products flagged as Featured in the admin panel, each card carrying image, name, material, price where published and a quick "Add to Enquiry" action
5	Why Alok Plastics	Three to five differentiator points in a designed row, written from the client's confirmed USPs; not a generic icon strip
6	Industries we serve	Logo-only section as specified in Section 5.7
7	Manufacturing & quality	Short visual explanation of process stages, machinery and material control; supports buyer confidence and product-level search visibility. Built only once the client supplies this information
8	Delivery & dispatch	Step-based visual of enquiry, confirmation, payment, packing, dispatch and delivery, stating timelines and packing standards as supplied by the client. The same content is reused on product pages and in the FAQ so the answer is consistent everywhere
9	Numbers / statistics	Animated counters for year established, years of experience, industries

#	Section	Requirement
		served, products in range and cities served. Only figures supplied in writing by the client are displayed
10	Blog preview	Three most recent articles with image, title and reading time, linking to the blog listing
11	FAQ	Six to ten common buyer questions in an accordion, marked up with FAQPage schema
12	Contact strip + CTA	Short contact block with phone, WhatsApp and email, followed by the global CTA band and footer

6.2 Page 2: About

- Page header with a short positioning statement
- **Our Story:** company history and journey narrative
- **Timeline:** key milestones by year (client-supplied)
- **Mission** and **Vision** presented as two distinct, designed blocks
- **Core Values:** the same values used in the ribbon, expanded with one line each
- **Culture / Life at Alok Plastics:** photographs and short copy
- **Manufacturing capability:** process, machinery, technology and quality control
- **Numbers band**
- **Why choose us / USP block**
- **Industries we serve** (logo section)
- CTA band and footer

6.3 Page 3: Products (Main Listing)

6.3.1 Page Structure

- Page header with a one-line description of the full range
- Category quick-navigation strip at the top
- A product grid showing every published product, paginated or infinite-scrolled
- Result count and active-filter summary always visible

6.3.2 Product Card

Element	Requirement
Image	Consistent studio treatment, lazy-loaded, fixed aspect ratio
Name	Product title, linked to the product detail page
Category	Small label
Key attribute	Material and/or size range
Price	Displayed where the client has published a price; otherwise "Price on request"
Quantity	Optional quantity input directly on the card
Action	"Add to Enquiry" button
Badge	Optional "Featured", "New" or "Best Seller" flag set from the admin panel

6.3.3 Search

- A prominent search field on the products page, in addition to the global header search
- Live suggestions, partial-match tolerance and a clear-search control

6.3.4 Filters

All filters shall be combinable, reflected in the URL so a filtered view can be shared or bookmarked, and clearable in one action.

Filter	Type	Source
Category	Multi-select	Product categories
Sub-category	Multi-select	Where sub-categories are defined
Material	Multi-select	HDPE, PPCP, Nylon, Brass, SS, Chemical
Size / Variant	Multi-select	Product variant data
Price range	Slider + min/max input	Product price
Application	Multi-select	Water cooler / display counter / deep freezer
Availability	Toggle	In stock / made to order (if maintained)
Featured	Toggle	Admin flag
Sort by	Single select	Relevance, price low-high, price high-low, newest, name A-Z
Filter values are generated from the product data itself. When the client adds a product with a new material or size in the admin panel, that option appears in the filter list automatically; no developer change is needed.		

6.4 Page 4: Product Category Page

- Same grid, search, filter and sort behaviour as the main products page, pre-filtered to the category
- Category-specific heading, introduction paragraph and SEO copy block, maintained in the category record
- Breadcrumb: Home › Products › Category
- Category-level FAQ section
- Link strip to sibling categories for internal linking and discovery

6.5 Page 5: Product Detail Page (PDP)

The product detail page is the primary conversion page of the website. It must contain everything a trade buyer needs in order to decide, and everything a search engine or AI engine needs in order to understand and cite the product.

6.5.1 Above the Fold

Element	Requirement
Breadcrumb	Home › Products › Category › Product
Image gallery	Multiple images with thumbnails, zoom on hover/tap and swipe on mobile
Product title	H1, exactly as maintained in the admin panel
Product code / SKU	Displayed where maintained
Price	Per piece / per set / per kg as applicable, with the unit clearly stated
Variant selector	Size, shape or type: selecting a variant updates price, image and code
Key specifications	Material, size, shape, colour, finish, packing quantity, application
Quantity input	Free numeric input; may be left blank : a blank quantity is valid and is sent as "Quantity not specified"
Primary action	"Add to Enquiry" (cart)

Element	Requirement
Secondary action	"Enquire on WhatsApp": opens chat pre-filled with this product
Trust strip	Dispatch timeline, bulk-order note, contact number

6.5.2 Below the Fold

- **Full description:** what the part is, where it is used, what it is compatible with
- **Specification table:** complete attribute list in a scannable table
- **Build quality & reliability:** material grade, durability and finish notes as supplied by the client
- **Key points:** three to six short bullets summarising why this part is chosen
- **Applications:** the equipment and use cases the part fits
- **Bulk / dealer enquiry block:** a short prompt for larger-quantity buyers
- **Delivery & dispatch:** reused from the global delivery content
- **Product FAQ:** four to eight product-specific questions with FAQPage schema
- **Recommended products:** related and frequently-bought-together items from the same or a complementary category, managed automatically with a manual override in the admin panel
- **Recently viewed:** optional strip of the visitor's recently opened products
- Global CTA band and footer

6.5.3 SEO Elements on the PDP

- Unique meta title and meta description per product, editable in the admin panel
- A single H1 per page, correct H2/H3 hierarchy
- Descriptive alt text on every image, generated from the product name and variant and editable
- Canonical URL; variants do not create duplicate indexable URLs
- **Product** and **BreadcrumbList** structured data, including price and availability where published
- Open Graph and Twitter Card tags so that a product link shared on WhatsApp renders with image, title and price

6.6 Page 6: Cart / Enquiry Basket

- Line items with thumbnail, product name, variant, unit price, editable quantity and a remove action
- Blank quantities are preserved and shown as "Quantity not specified"
- Line totals and an **indicative order total**, displayed with a clear note that the amount is indicative and that final pricing, taxes and freight are confirmed by Alok Plastics on WhatsApp
- An optional message/notes field for the buyer
- Cart contents persist across sessions on the same device, and are linked to the buyer's profile once verified
- "Continue browsing" and "Send Enquiry" actions

6.7 Page 7: Career

6.7.1 Page Sections

- Page header, a short employer-brand statement
- **Search field** for openings, searching title, department and location
- Filters for department, location and employment type
- **Current openings list:** each entry showing title, department, location, experience required and posting date, with an "Apply Now" action
- **Life at Alok Plastics:** photographs, short copy and culture points; images managed from the admin panel
- **Why work with us / benefits** section
- **Hiring process:** the step-by-step recruitment journey (client-supplied)

- **Career FAQ** section
- **General application form** for candidates whose role is not currently listed
- CTA band and footer

6.7.2 Job Detail & Application

- Each opening has its own page with full description, responsibilities, requirements, experience, location and employment type
- An "Apply Now" action directly beneath the job description opens the application form pre-tagged with that job
- JobPosting structured data on every opening so listings are eligible for Google Jobs

6.7.3 Application Form Fields

Field	Required	Notes
Full name	Yes	
Phone number	Yes	Validated Indian mobile format
Email address	Yes	Format validated
Position applied for	Yes	Pre-filled from the job page; a free-text/"Other" option on the general form
Current location	Yes	
Total experience	Yes	Years and months, or "Fresher"
Current / last employer	No	
Expected joining date	No	
Resume upload	Yes	PDF, DOC or DOCX; maximum 5 MB
Cover note / message	No	Free text
Consent checkbox	Yes	Consent to store and process the application

- Anti-spam protection on submission
- Automatic acknowledgement email to the candidate
- Notification email to the client's careers address, with the resume attached or linked
- Every application is recorded in the admin panel and mirrored to the Google Sheet

6.8 Page 8: Contact

- Enquiry form: name, company name, phone, email, city, subject/interest, message, consent
- Direct contact block: address, phone number(s), email address(es) and business hours
- Separate contact routes displayed where the client provides them: sales, careers, support
- Embedded Google Map pinned to the Chandigarh facility with a "Get Directions" action
- "Chat on WhatsApp" and "Call Now" buttons
- Social media links
- Submissions delivered to the business email, recorded in the admin panel and mirrored to the Google Sheet

6.9 Page 9: Blog

- **Blog listing page:** article cards with cover image, title, excerpt, category and date; category filter and search
- **Article page:** cover image, H1, author/date line, table of contents for longer pieces, body content with correct heading hierarchy, in-article product links, share buttons, related articles and a closing CTA to the product range
- Article structured data on every post

- Five launch articles are delivered as part of this project (Section 13.3)
- The blog is included in the sitemap and in the site search index

6.10 Pages 10-12: Legal Pages

Page	Contents
Terms & Conditions	Website usage terms, product and pricing disclaimers, enquiry and order process, payment terms, dispatch and risk, warranty position, limitation of liability, intellectual property, governing law and jurisdiction
Privacy Policy	What data is collected (including phone number, company details and GSTIN), why it is collected, how OTP verification data is handled, cookies and analytics, data sharing, retention period, user rights and a privacy contact
Refund / Return Policy	Conditions for return or replacement, damage-in-transit process, timelines for raising a claim, refund method and timeline, and non-returnable items
Legal Content: Responsibility Manhar Creatives will draft these three pages from standard industry templates adapted to Alok Plastics' actual process. The client must review, amend and approve the final wording. Manhar Creatives is not a legal advisor and does not provide legal advice. Alok Plastics is responsible for having the final text verified by its own legal or compliance advisor before publication.	

7. Enquiry-to-Order Journey

This section defines the core commercial flow of the website. It is the feature on which the project's business value depends and is specified here step by step.

7.1 Journey Overview

Step	Stage	What happens
1	Browse	Buyer finds a product through navigation, category, search, filters or a search-engine result
2	Select	Buyer opens the product page, selects a variant and optionally enters a quantity
3	Add to Enquiry	Buyer adds the product to the enquiry basket; quantity may be left blank
4	Review basket	Buyer adds more products, edits quantities and reviews the indicative total
5	Verify	On submitting the enquiry the buyer verifies their phone number with an OTP
6	Profile	A short, guided sequence collects the buyer's business details, presented as an experience, not a long form
7	Account created	A buyer account is created automatically against the verified phone number
8	WhatsApp handoff	The buyer is redirected to WhatsApp with a pre-formatted enquiry message ready to send
9	Record	The enquiry is stored in the database, shown in the admin panel and written to the Google Sheet
10	Response	Alok Plastics replies on WhatsApp with a greeting and bank/payment account details
11	Payment	Payment is collected manually, outside the website , because of the transaction values involved
12	Fulfilment	The admin updates the enquiry status as the order progresses

7.2 Add-to-Enquiry Rules

- Quantity is **optional**. A blank quantity is a valid enquiry and is transmitted as "Quantity not specified"
- Quantity accepts whole numbers only, with a sensible maximum, and shows the correct unit (pc / set / kg) per product
- Adding an item shows a confirmation toast with "View basket" and "Continue browsing" actions; the buyer is never force-navigated away from the catalogue
- The basket count in the header updates immediately
- Adding the same product and variant again increases the existing line rather than creating a duplicate line
- The basket survives page refresh and browser restart on the same device

7.3 Phone + OTP Verification

- Login is by **mobile number and OTP only**. There is no password, no email login and no social login
- The verification step is triggered when the buyer submits the enquiry, not when they first add an item, so browsing is never interrupted
- A returning verified buyer on the same device skips straight to the WhatsApp step
- OTP is numeric, time-limited and single-use, with a resend timer and a limited number of attempts

- Rate limiting and anti-abuse protection are applied per number and per IP address
- A clear fallback is shown if the OTP cannot be delivered, including a direct WhatsApp contact route so that no enquiry is lost

Dependency: OTP Delivery

OTP delivery requires a third-party service. In India, sending transactional SMS requires the sender ID and message templates to be registered on a **TRAI-mandated DLT platform**, which the business entity must complete in its own name.

Two routes are available: **(a) SMS OTP**, which requires DLT registration plus a per-message cost, or **(b) WhatsApp OTP**, which avoids DLT but requires a WhatsApp Business API account and per-conversation charges.

Client decision and account required. Manhar Creatives will integrate the chosen provider and complete the technical setup; the subscription, registration and per-message charges are borne by the client and are not included in the project price.

7.4 Guided Profile Capture

The client has specified that this step must feel like a guided experience rather than a long form. The following behaviour is therefore required.

- Fields are presented in a **short sequence of steps**, one logical group per step, with a visible progress indicator
- Each step asks for as little as possible and confirms what has been captured before moving on
- Entries are validated inline, in plain language, as the buyer types
- The buyer can move back without losing what they have already entered
- Progress is saved as the buyer advances, so an interruption does not restart the flow
- A returning verified buyer sees their saved details pre-filled and only confirms them

7.4.1 Information Collected

Field	Required	Purpose
Mobile number	Yes	Verified by OTP; the account identifier
Contact person name	Yes	Addressing the buyer correctly
Company / firm name	Yes	Identifies the buying business
Business type	No	Manufacturer, dealer, fabricator, service, retail: helps the client prioritise
Email address	Yes	Quotation and invoice correspondence
Billing address	Yes	Invoice preparation
Delivery address	No	Captured separately only when different from billing
City	Yes	Dispatch planning and regional insight
State	Yes	GST place of supply
PIN code	Yes	Freight estimation
GSTIN	Optional	Invoicing; explicitly not compulsory, per client instruction
Message / special requirement	No	Anything the buyer wants to add
Consent	Yes	Permission to contact the buyer and store the details
Client confirmation required: the exact field list above. Manhar Creatives has proposed these based on how a spare-parts order is invoiced and dispatched. Alok Plastics should confirm whether any field should be added, removed or made optional; every additional mandatory field reduces the number of completed enquiries.		

7.5 WhatsApp Handoff

- On completion, the buyer is redirected to WhatsApp with a message **pre-composed and pre-filled**; the buyer only presses send
- The message is addressed to the Alok Plastics business number
- The message format is fixed and machine-readable so that the sales team reads every enquiry in the same shape
- If the redirect fails or WhatsApp is unavailable, the enquiry is still recorded and a copy of the message is shown on screen with a copy-to-clipboard action
- The enquiry is written to the database **before** the redirect, so no enquiry is lost even if the buyer never presses send in WhatsApp

7.5.1 Sample WhatsApp Message Format

The following is the proposed message template. Placeholders in angle brackets are replaced with live data. Final wording requires client approval.

```
*NEW ENQUIRY | ALOK PLASTICS*
Enquiry ID: ALK-2026-00184
Date: 19 Sep 2026, 4:32 PM

*BUYER DETAILS*
Name       : <Contact person name>
Company    : <Company / firm name>
Mobile     : <Verified mobile number>
Email      : <Email address>
City/State : <City>, <State> to <PIN>
Address    : <Billing address>
GSTIN      : <GSTIN or "Not provided">

*ITEMS REQUESTED*
1. Float Valve (Nylon)
   Qty: 50 set | Rate: Rs.180/set | Rs.9,000
2. Push Cocks, Heavy (Brass)
   Qty: 100 pc | Rate: Rs.300/pc | Rs.30,000
3. Ventilation Jalli, RS 80 (PPCP)
   Qty: Not specified | Rate: On request

Indicative total : Rs.39,000
(Excludes GST and freight. Final pricing to be
 confirmed by Alok Plastics.)

*BUYER NOTE*
<Message entered by the buyer, if any>

Sent from alokplastics.com
```

Client confirmation required: the greeting line, the enquiry-ID format, whether prices should appear in the message at all, and whether the message should go to one number or be routed to different numbers by product category or by region.

7.6 Business Reply & Payment

- After the enquiry arrives, Alok Plastics responds on WhatsApp with a greeting, confirmation of availability and the bank/payment account details

- The reply may be sent using WhatsApp Business quick replies or an automated first response configured on the client's WhatsApp Business account
- The **payment process is fully manual and outside the website**, as instructed by the client, because of the transaction values involved
- **No payment gateway, no online checkout and no card/UPI collection** is built into the website

Information required from client: the exact greeting/auto-reply wording, the bank account and payment details to be shared, and whether that reply should be manual or configured as an automatic first response on WhatsApp Business.

7.7 Validation & Edge Cases

Case	Required behaviour
Buyer abandons at OTP	Basket is retained; enquiry is not created; buyer can resume later
OTP not received	Resend after the timer; after the attempt limit, show the WhatsApp fallback
Invalid mobile number	Inline format error before OTP is requested
Duplicate enquiry within minutes	Detected and flagged in the admin panel rather than silently duplicated
Product removed while in basket	Line is marked unavailable with a clear message at review
Price changed while in basket	Latest price is applied and the change is indicated to the buyer
Empty basket submission	Submit action disabled with an explanatory message
Buyer declines consent	Enquiry cannot be submitted; WhatsApp and phone contact remain available
WhatsApp blocked on the device	On-screen message with copy-to-clipboard and the business phone number
Spam or bot submission	Rate limiting, honeypot and challenge on repeated attempts

8. Admin Panel Requirements

The admin panel gives Alok Plastics day-to-day control of the website without developer involvement. It is a focused operations tool: deliberately **not** a CRM.

8.1 Access & Security

- Secure login on a private admin route
- Role-based access: **Administrator** (full control) and **Staff** (products, enquiries and careers, no settings)
- Strong password policy, session timeout and automatic logout on inactivity
- Brute-force protection with account lockout after repeated failed attempts
- An activity log recording who changed what and when

8.2 Dashboard

- Counts of new enquiries today, this week and this month
- Enquiries by status
- Latest enquiries list with one-click open
- New job applications count
- Total published products and categories
- Quick actions: add product, add job, view enquiries

8.3 Product Management

Capability	Requirement
Add / edit / delete	Full CRUD on products, with soft delete so a removed product can be restored
Publish state	Draft, Published, Hidden; a product can be prepared before it goes live
Categories	Create, rename, reorder and delete categories; assign a product to multiple categories
Variants	Size, shape or type variants with their own price, code and image
Pricing	Price, unit (pc / set / kg) and an optional "Price on request" mode
Media	Multiple images per product with drag-to-reorder and a primary image; automatic compression and modern-format conversion on upload
Content	Description, key points, specifications, applications and product FAQ
SEO fields	Meta title, meta description, URL slug and image alt text per product
Flags	Featured, New, Best Seller
Related products	Automatic suggestions with a manual override
Bulk actions	Bulk publish, hide, delete and category reassignment
Search & filter	Find products inside the panel by name, code, category or status
Dynamic Website Requirement When a product is added, edited or removed in the admin panel, the website must reflect it without any developer involvement : the product page is generated, the category listing and dropdown update, the filters pick up any new material or size value, the sitemap is regenerated and the search index is refreshed.	

8.4 Enquiry Management

- Every enquiry submitted on the website is listed with enquiry ID, date, buyer, company, item count and indicative value
- Enquiry detail view showing the complete buyer profile and every line item
- Filter and search by status, date range, city and buyer
- Export the filtered list to CSV or Excel
- An internal notes field per enquiry for the sales team
- Direct "Open in WhatsApp" action against the buyer's number

8.4.1 Order Status

Each enquiry carries a single status which the admin updates as the order progresses. The status list is deliberately short.

Status	Meaning
New	Enquiry received, not yet actioned
In Discussion	Sales team is in conversation with the buyer
Quoted	Price and availability shared
Confirmed	Buyer has confirmed the order
Payment Received	Payment received outside the system and recorded manually
Dispatched	Goods dispatched
Completed	Order delivered and closed
Cancelled	Enquiry or order cancelled, with an optional reason

Status	Meaning
Explicitly Out of Scope	The admin panel is not a CRM. It will not include a sales pipeline, lead-scoring, deal stages, follow-up automation, task assignment, quotation generation, invoice generation, GST filing, stock/inventory tracking, purchase orders, dealer price lists or customer-account statements. Any of these can be scoped and quoted as a separate phase in future.

8.5 Career Management

- Add, edit, publish, unpublish and delete job openings
- Fields: title, department, location, employment type, experience, description, responsibilities, requirements and closing date
- **Image upload** against a job posting, and image management for the "Life at Alok Plastics" gallery
- View every application received, with the resume downloadable and the ability to filter by position and date
- Mark an application as Reviewed, Shortlisted or Rejected
- Export applications to CSV or Excel

8.6 Content Management

Area	Editable by the client
Home page highlights	Which products appear in the featured section

8.7 Notifications & Data Sync

- Email notification to the client on every new enquiry and every job application
- Every enquiry and every application written to a **Google Sheet** in addition to the database, giving the client a familiar, always-available working copy
- The sheet is append-only from the website; editing the sheet does not alter website data
- If the sheet write fails, the enquiry is still saved in the database and the failure is retried and logged; an enquiry is never lost because of a sync error

9. Consolidated Feature List

The complete feature list for this project, gathered in one place. Each feature is specified in detail in the section shown in brackets.

Brand & Design (10)

1. Brand and competitor research (3.2) · 2. Three refined logo directions on real-world mockups (3.2) · 3. Final logo package in all formats, light and dark (3.1) · 4. Colour palette with HEX, RGB and CMYK (3.4) · 5. Typography system (3.5) · 6. Iconography and graphic element set (3.1) · 7. Brand style guide document (3.1) · 8. Premium industrial dark theme, non-generic (3.3) · 9. Page-wise interface design for desktop, tablet and mobile (3.3) · 10. Admin panel interface design (3.3).

Website, Global Elements (13)

11. Fixed header with five-item navigation (5.1) · 12. Products dropdown driven by live categories (5.2) · 13. Global site search with live suggestions (5.8) · 14. Enquiry basket indicator in the header (5.1) · 15. Scrolling values ribbon below the hero (5.6) · 16. Industries-we-serve logo section (5.7) · 17. Floating WhatsApp button on every page (5.4) · 18. Global CTA band on every page (5.5) · 19. Full footer with credit to Manhar

Creatives (5.3) · 20. Branded 404, empty and error states (5.9) · 21. Cookie and consent notice (5.10) · 22. Responsive design across mobile, tablet and desktop (10.2) · 23. Cross-browser compatibility (10.3).

Website Pages (16)

24. Home page with full-viewport hero video (6.1) · 25. About page with story, timeline, culture and manufacturing (6.2) · 26. All-products listing page (6.3) · 27. Category pages generated per category (6.4) · 28. Individual product detail pages (6.5) · 29. Product search on the products page (6.3.3) · 30. Multi-attribute product filters including price range (6.3.4) · 31. Product FAQ and recommended products on every product page (6.5.2) · 32. Delivery and dispatch process section (6.1.2) · 33. Career page with search and filters (6.7) · 34. Individual job pages with direct Apply Now (6.7.2) · 35. Life at Alok Plastics section (6.7.1) · 36. General application form with resume upload (6.7.3) · 37. Contact page with form, map and direct channels (6.8) · 38. Blog listing and five launch articles (6.9) · 39. Terms & Conditions, Privacy Policy and Refund Policy (6.10).

Enquiry System (9)

40. Optional quantity input on product cards and pages (7.2) · 41. Add to enquiry basket with persistent cart (7.2) · 42. Basket review with indicative total (6.6) · 43. Phone-number login with OTP verification (7.3) · 44. Guided, step-based buyer profile capture (7.4) · 45. Automatic buyer account creation (7.1) · 46. Pre-formatted WhatsApp enquiry handoff (7.5) · 47. Enquiry stored before redirect so nothing is lost (7.5) · 48. Manual payment process, no gateway (7.6).

Admin Panel (12)

49. Secure role-based admin login (8.1) · 50. Dashboard with enquiry and catalogue counts (8.2) · 51. Product add, edit and delete with variants and media (8.3) · 52. Category management (8.3) · 53. Per-product SEO fields (8.3) · 54. Enquiry list, detail view and CSV export (8.4) · 55. Order status workflow (8.4.1) · 56. Job posting management with image upload (8.5) · 57. Job application inbox with resume download (8.5) · 58. Home page featured products management (8.6) · 59. Email notification on every enquiry and application (8.7) · 60. Parallel Google Sheet record of enquiries and applications (8.7).

Technical, SEO & Setup (17)

61. Next.js application with database-driven catalogue (11.1) · 62. Hosting configuration on the client's Hostinger account (11.2) · 63. Cloudflare DNS setup (11.3) · 64. SSL and HTTPS across the whole site (11.4) · 65. Professional business email configuration (11.5) · 66. Database setup and configuration (11.6) · 67. OTP provider integration (11.7) · 68. WhatsApp integration (11.8) · 69. Google Business Profile setup (11.9) · 70. Google Maps integration on Contact (11.9) · 71. Google Analytics 4, Search Console and Tag Manager (11.9) · 72. Website security hardening and backups (11.10) · 73. Migration and go-live with 301 redirect mapping (11.12) · 74. Technical SEO: sitemap, robots, canonicals, speed (13.1) · 75. On-page SEO and structured data across every page (13.1, 13.2) · 76. Local SEO foundation for Chandigarh and the Tricity (13.4) · 77. Hero video production (12.1) · 78. AI-generated product and section imagery (12.2).

10. Non-Functional Requirements

10.1 Performance

Metric	Desktop target	Mobile target
Google PageSpeed / Lighthouse score	85+	75+
Largest Contentful Paint	Under 2.5 s	Under 3.0 s
Cumulative Layout Shift	Under 0.1	Under 0.1
Interaction to Next Paint	Under 200 ms	Under 200 ms

Metric	Desktop target	Mobile target
Image format	WebP / AVIF with fallback	WebP / AVIF with fallback

- All below-fold images and the hero video are lazy-loaded
- CSS, JavaScript and HTML minified in production; unused code removed
- Product images automatically compressed and resized on upload in the admin panel
- Static and cacheable assets served through Cloudflare's edge cache
- Targets are measured on the delivered site under normal network conditions and are subject to the hosting plan actually in use (Section 11.2).

10.2 Responsive Design

The website shall be fully responsive and is developed **mobile-first**, because the majority of trade buyers in this segment browse and enquire from a phone.

Category	Breakpoint	Behaviour
Mobile	360-767 px	Single column, hamburger drawer, 44 px minimum tap targets, static hero image, simplified motion
Tablet (small)	768-1023 px	Two-column grids, drawer navigation retained, larger spacing
Tablet (large)	1024-1279 px	Multi-column layouts, full navigation bar considered
Desktop	1280-1919 px	Full layout, all hover states and animations enabled
Large screens	1920 px and above	Max-width container with centred content and generous margins

- Body text never falls below 16 px on any device
- Product grids reflow from 1 column on mobile to 2-3 on tablet and 3-4 on desktop
- Specification tables convert to stacked key-value cards on mobile rather than scrolling horizontally
- Forms use the correct mobile input types so the right keyboard appears for phone, email and numeric fields
- Every page is verified on real devices before handover, not only in a browser simulator

10.3 Browser Compatibility

The website shall render and function correctly on:

- Google Chrome, latest two versions (Windows, macOS, Android)
- Mozilla Firefox, latest two versions
- Microsoft Edge, latest two versions
- Apple Safari, latest two versions (macOS and iOS)
- Samsung Internet, latest version
- Graceful degradation on older browsers: content and enquiry functionality remain usable even where advanced visual effects are not supported

10.4 Accessibility

- WCAG 2.1 Level AA targeted wherever feasible on a dark theme
- Minimum 4.5:1 text contrast and 3:1 for interactive boundaries
- Full keyboard navigation with a visible focus indicator on every interactive element
- Descriptive alt text on every meaningful image
- Correct heading order on every page, with exactly one H1
- Form labels attached to inputs, with errors announced to assistive technology
- **prefers-reduced-motion** honoured throughout

10.5 Scalability & Maintainability

- The catalogue can grow from the launch range to several hundred products without structural rework
- New categories, filters, pages and blog articles are added through the admin panel, not through code
- Component-based front-end architecture so that design changes propagate consistently
- Code is documented and handed over in a repository the client owns
- The architecture leaves room for a future phase: online payment, dealer pricing or a B2B portal, without rebuilding the foundation

11. Technical Requirements

11.1 Technology Stack

Layer	Technology	Notes
Front-end framework	Next.js (React)	As specified by the client; server rendering for SEO
Language	TypeScript	Type safety across front-end and API layer
Styling	Utility-first CSS with a token-based design system	Enforces the brand system in code
Back-end	Next.js server routes / API layer	Serves the admin panel and enquiry endpoints
Database	Relational database (MySQL/PostgreSQL)	Hosted on the client's infrastructure
Media storage	Server or object storage with CDN delivery	Product images and resumes
CDN / DNS / WAF	Cloudflare	DNS, caching, SSL and basic protection
Version control	Git repository handed to the client	Full source-code ownership

11.2 Hosting & Deployment

The client holds an existing **Hostinger** subscription, which is to be fully utilised. One technical point must be settled before development begins.

Hosting Compatibility: Decision Required

A Next.js application with server rendering, API routes and an admin panel requires a **Node.js runtime**. Hostinger's shared **Premium** plan is a PHP/WordPress plan and does not provide a Node.js application runtime; Hostinger offers Node.js on its **Business** and **Cloud** plans and on its VPS / web-apps hosting.

Option A (recommended): upgrade the existing Hostinger subscription to a Node.js-capable Hostinger plan. Everything (domain, application, database and email) stays with Hostinger under one account, and the existing subscription value is carried forward.

Option B: keep the domain, email and database on the current Hostinger plan and run the application on a Node-capable runtime, with Cloudflare pointing the domain at it. Nothing is wasted, but the client manages two providers.

Option C (not recommended): a static export of the site. This would remove the admin panel, the OTP login and the dynamic product catalogue, and is therefore incompatible with the agreed scope.

Any plan upgrade cost is a **client-side subscription cost** and is not part of the project price. Manhar Creatives will confirm the exact current plan on the client's Hostinger account and recommend the smallest sufficient upgrade before development starts.

- Manhar Creatives configures the server, deployment pipeline, environment variables and production build
- Separate production and staging environments where the plan allows, so the client reviews changes before they go live
- The live site is delivered fully deployed and accessible at **alokplastics.com**
- A documented deployment and rollback procedure is included in the handover pack
- After handover the client owns the hosting account and all recurring renewal costs

11.3 DNS: Cloudflare

- Domain nameservers pointed to **Cloudflare**
- All records (A, CNAME, MX, TXT, SPF, DKIM, DMARC) recreated correctly so that email delivery is not interrupted during the switch
- Proxy, caching rules, compression and minification configured
- Automatic HTTPS rewrite and a permanent redirect from **www** to the canonical domain (or the reverse, per client preference)
- Basic firewall and bot-protection rules enabled
- The Cloudflare account is created in the **client's name** and handed over at the end of the project

11.4 SSL / HTTPS

- SSL certificate installed and HTTPS enforced site-wide
- HTTP automatically redirected to HTTPS
- HSTS and mixed-content checks verified before launch
- Automatic certificate renewal configured

11.5 Business Email

- Professional email addresses configured on the domain, for example **info@alokplastics.com**, **sales@alokplastics.com**, **careers@alokplastics.com**
- SPF, DKIM and DMARC records configured so that website notifications and business mail reach the inbox rather than the spam folder
- Website forms configured to send from an authenticated address on the domain
- **Email mailbox purchase or subscription cost, where applicable, is borne by the client** and is not included in the project price

Information required from client: the full list of email addresses to be created, and which address each website form should deliver to; sales enquiries, career applications, general contact and support may each go to a different inbox.

11.6 Database

- Database provisioned on the client's infrastructure, with credentials stored only in server environment variables
- Schema designed around products, categories, variants, buyers, enquiries, jobs and applications, with indexing on the fields used for search and filtering
- Automated periodic backups
- No customer data stored in browser storage beyond the basket and session token

11.7 OTP Provider

- Integration with a third-party OTP delivery service, chosen with the client between SMS and WhatsApp OTP (see Section 7.3)
- The provider account is created in **Alok Plastics'** name so the client owns the sender identity and the message history
- For SMS: DLT registration of the entity, sender ID and message templates must be completed by the client; Manhar Creatives will supply the template text and guide the submission
- Delivery failures are logged, and the enquiry flow always offers a WhatsApp fallback
- **Subscription, registration and per-message charges are borne by the client.**

11.8 WhatsApp Integration

- The floating button and all WhatsApp CTAs use a click-to-chat link with a pre-filled context message; this requires no paid API
- The enquiry handoff (Section 7.5) uses the same mechanism, with the full enquiry message pre-composed

- The business number must be an active **WhatsApp Business** number
- If the client later wants fully automated outbound messages or an automated first reply, that requires a WhatsApp Business API account and is quoted separately

Information required from client: the WhatsApp Business number (or numbers) to receive enquiries, and whether enquiries should be routed to different numbers by product category or by region.

11.9 Google Ecosystem Setup

Service	Setup included
Google Business Profile	Profile created or claimed, category, service area, products, hours, photos, description and enquiry links configured; verification completed by the client
Google Maps	Interactive map embedded on the Contact page with a "Get Directions" action
Google Analytics 4	Property created and installed; events configured for WhatsApp clicks, phone clicks, add-to-enquiry, enquiry submission, form submissions and file downloads
Google Search Console	Property verified, XML sitemap submitted, indexing requested and coverage monitored to handover
Google Tag Manager	Container installed; all tracking tags managed through GTM rather than hard-coded
Information required from client: access to any existing Google Business Profile, Analytics or Search Console property. Where none exists, new properties will be created in an account owned by Alok Plastics and handed over.	

11.10 Security

- HTTPS enforced site-wide with security headers configured (CSP, HSTS, X-Frame-Options, X-Content-Type-Options, Referrer-Policy)
- All form input validated and sanitised on both the client and the server
- Protection against SQL injection, cross-site scripting and cross-site request forgery
- Rate limiting on OTP requests, enquiry submission and all public forms
- Anti-bot protection on every public form
- Admin panel on a private route with brute-force protection, session timeout and an activity log
- Passwords stored only as salted hashes; no plaintext credentials anywhere
- Resume and image uploads restricted by file type and size, with server-side type verification
- Cloudflare firewall rules and bot filtering enabled
- Dependencies checked for known vulnerabilities before launch

11.11 Backup & Recovery

- Automated database and media backups with a documented restore procedure
- Source code held in a Git repository owned by the client
- A pre-launch snapshot retained so the site can be restored to its launch state if required

11.12 Migration & Go-Live

The existing WordPress website is live on the same domain. Replacing it is a migration, not a fresh launch, and must be handled so that no existing search visibility or inbound link is lost.

- A full backup of the existing WordPress site and its database is taken and retained before any change is made
- Existing indexed URLs are listed from Google Search Console and mapped to their closest equivalent on the new site
- **301 redirects** are configured for every old URL that has a new equivalent; anything with no equivalent redirects to the nearest category page rather than to a 404

- The new site is built and reviewed on a staging URL that is blocked from search-engine indexing
- Go-live is scheduled at a low-traffic time, with DNS time-to-live reduced in advance so the switch propagates quickly
- Immediately after go-live: `robots.txt` and indexing are re-enabled, the sitemap is resubmitted, indexing is requested and a crawl is run to confirm there are no broken links or redirect loops
- Business email continues to work through the switch because the MX records are recreated on Cloudflare before the nameserver change (Section 11.3)
- The old site remains recoverable from backup until the client confirms acceptance

12. Content & Media Production

12.1 Hero Video

The landing-page hero video is a named client requirement and is produced by Manhar Creatives as part of this project.

Attribute	Specification
Purpose	Show the Alok Plastics journey: material, moulding/manufacturing, finishing, quality check, packing and dispatch
Duration	20-40 seconds, seamlessly looping
Treatment	Cinematic, colour-graded to the approved brand palette; steady, deliberate shots
Audio	None. The video plays muted as a background layer
Format	MP4 (H.264) plus a modern web format, compressed for web delivery
Resolution	1920×1080 for desktop, with a lighter mobile variant
Poster frame	A still image displayed before the video loads and used in place of the video on mobile
Text overlay	None burned into the video. All headline text is live HTML for SEO and accessibility

12.1.1 Footage Source

- If Alok Plastics can supply raw footage of its own facility and process, that footage is used; it is always more credible than any substitute, and the client is strongly encouraged to provide it
- Where raw footage is not available, Manhar Creatives will assemble the video from AI-generated and licensed industrial visuals, treated so that it reads as one consistent piece
- No footage will be used that misrepresents the client's actual facility, machinery or capability
- Two rounds of revision are included on the final video edit

Information required from client: raw video clips or photographs of the facility, machines, production process, packing and dispatch, even phone-shot footage is usable. If none can be provided, written confirmation is needed that representative visuals may be used instead.

12.2 Product & Section Imagery

- Up to **100 AI-generated product visuals** are produced and configured, as agreed in the quotation
- Every product image is treated to one consistent studio look; the same background, lighting direction, angle logic and shadow across the entire catalogue
- AI-generated imagery is also used for section backgrounds and supporting visuals where no real photograph exists

- Where the client supplies real product photographs, those are prioritised over generated images and are retouched to match the same treatment
- Every image is compressed, served in a modern format and given descriptive alt text
- AI-generated visuals represent the product type accurately; they are not used to imply machinery, certification or facility scale that the client does not have

12.3 Industry Logos

- 15-20 logos for the "Industries We Serve" section, supplied by the client
- Each logo is cleaned, resized and normalised to a single visual treatment
- Written confirmation is required from the client that each logo may be displayed

12.4 Copywriting

- Manhar Creatives writes all website copy: headings, section copy, product descriptions, CTAs, meta titles and descriptions, FAQ answers and the five blog articles
- Copy is written from the factual information supplied by the client; it does not invent capability, certification or scale
- Copy is delivered for client review, and factual corrections are applied before launch
- All content is in English only

13. SEO Requirements

Realistic Expectation

This project delivers a **complete, correctly-built SEO foundation**: technical structure, on-page optimisation, structured data, local presence and content. It does not, and cannot honestly, guarantee a specific Google ranking position.

Search rankings depend on competition, domain history, backlinks and ongoing activity over months. What is guaranteed here is that the website is built so that it **can** rank, is fully crawlable and indexable, and gives search engines everything they need to understand and rank Alok Plastics.

13.1 Technical SEO

- XML sitemap generated automatically and resubmitted whenever products or articles change
- `robots.txt` configured to allow crawling of all public pages and block admin and system routes
- Canonical URL on every page; filtered and paginated views handled so they do not create duplicate content
- Clean, keyword-relevant URL structure (Section 4.3) with automatic 301 redirects on slug changes
- Correct heading hierarchy, one H1 per page
- Descriptive alt text on every image
- Open Graph and Twitter Card tags on every page so shared links render properly in WhatsApp and on social platforms
- Mobile-first indexing readiness and Core Web Vitals within the targets in Section 10.1
- No broken internal links or orphan pages at handover

13.1.1 Structured Data

Schema type	Applied to
Organization	Site-wide: company name, logo, contact points and social profiles
LocalBusiness	Home and Contact: address, geo-coordinates, hours and phone
Product	Every product page. Name, image, description, material, SKU and price where published
BreadcrumbList	All category, product and article pages
FAQPage	Home, category, product and career FAQ sections
ItemList	Category and all-products listing pages
Article	Every blog article
JobPosting	Every career opening
WebSite + SearchAction	Site-wide, enabling a site-search box in search results

13.2 On-Page SEO

- A unique, intent-matched meta title and meta description for every page, including every product page
- A keyword map assigning a primary and secondary keyword to each page, so that no two pages compete for the same term
- Category pages optimised for category-level terms; product pages optimised for specific part names
- An SEO content block on every category page, editable by the client

- Deliberate internal linking: home to categories, categories to products, products to related products, and blog articles to relevant product pages
- Image file names and alt text written for search as well as accessibility

13.2.1 Indicative Keyword Directions

The following illustrates the intent groups the site will be structured around. Final keyword selection follows research on actual search volume, competition and intent during Month 1 of the SEO work.

Intent group	Indicative search terms
Category-level	water cooler spare parts, display counter spare parts, deep freezer spare parts
Product-level	float valve for water cooler, push cock brass, ventilation jalli, adjustable leg insert, F-bush display counter, connecting bush, L-type hinge, PUF chemical
Commercial intent	water cooler spare parts wholesale, deep freezer parts dealer, spare parts manufacturer
Local intent	water cooler spare parts Chandigarh, deep freezer spare parts Mohali, cooling parts supplier Tricity
Informational	how to replace a water cooler float valve, which material is used for display counter bushes, deep freezer gasket sizes

13.3 Blog Content Plan

Five SEO-optimised articles are written and published as part of this project. Each answers a question a real buyer or technician searches for, and each links naturally into the relevant product or category page so that the article contributes to enquiries rather than only to traffic.

#	Proposed article	Primary intent	Links into
1	How to Identify the Right Water Cooler Spare Part: A Practical Guide	Informational → commercial	Water cooler category
2	Float Valve, Push Cock and Waste Pipe: What Fails First in a Water Cooler and Why	Troubleshooting	Float valve, push cocks, waste pipe
3	HDPE, PPCP, Nylon or Brass: Choosing the Right Material for Cooling Equipment Parts	Comparison	All categories
4	Display Counter Hardware Explained: Bushes, Hinges, Locks and Door Springs	Educational	Display counter + hardware categories
5	A Buyer's Guide to Sourcing Deep Freezer Spare Parts in Bulk	Commercial	Deep freezer category, bulk enquiry

- Each article is 900-1,500 words with a clear heading structure, FAQ block and internal links
- Each has its own meta title, meta description, cover image and Article schema
- Final topics are confirmed with the client after keyword research

13.4 Local SEO

- Google Business Profile fully completed: categories, service area, products, hours, description, photographs and enquiry links
- Consistent Name, Address and Phone (NAP) on the website, in schema and on the profile
- LocalBusiness schema with geo-coordinates
- Location-relevant content on the Contact page and, where justified, in category copy
- Submission to relevant Indian business directories and B2B listings
- A review-request approach the client can use after each completed order

Information required from client: confirmation of the exact business name, address and phone number to be used

consistently everywhere, and access to any existing Google Business Profile listing.

13.5 Measurement

The following are tracked from launch. The primary business measure is **qualified enquiries**, not traffic.

Metric	Where it is measured
Organic impressions and clicks	Google Search Console
Keyword positions and indexed pages	Google Search Console
Sessions, sources and page performance	Google Analytics 4
WhatsApp clicks	GA4 event
Phone clicks	GA4 event
Add-to-enquiry actions	GA4 event
Enquiry submissions	GA4 event + admin panel + Google Sheet
Career applications	Admin panel + Google Sheet
Google Business Profile actions	Google Business Profile insights
Ongoing monthly SEO management, link building and content production after launch are not part of this project. They can be taken up as a separate retainer (see Section 17).	

14. Project Timeline

14.1 Delivery Commitment

Manhar Creatives commits to completing the full project within **2 to 3 weeks**.

When the clock starts

The 2-3 week period is counted from the date on which **both** of the following have been received:

1. The **50% advance payment**, and
2. The **complete requirement content** listed in Section 16: company information, product details, logos, contact details and career content.

The countdown does not begin on the date of confirmation alone. Partial content means partial start: sections whose content has not arrived cannot be built.

14.2 Phase Plan

#	Phase	Duration	Key outputs
1	Research & brand identity	3-4 days	Research, three logo directions on mockups, palette, typography, style guide: client approval gate
2	Design & development	8-11 days	Design and build run together across the website and the admin panel: page structure, product catalogue, enquiry flow, OTP, WhatsApp handoff and admin panel. A working preview link is shared for review: client approval gate

#	Phase	Duration	Key outputs
3	Content, media & SEO	2-3 days	Hero video, product visuals, copy, five blog articles, on-page SEO and schema
4	Integrations & setup	1-2 days	Hosting, Cloudflare DNS, SSL, email, database, Google ecosystem, Sheets sync
5	Testing & launch	1-2 days	Functional, responsive, browser and performance testing; deployment; handover walkthrough

Phases overlap where dependencies allow; content production and media work run alongside development, which is how the full scope is delivered inside a 2-3 week window rather than the sum of the individual phase durations.

14.3 Approval Gates

Three points require the client to respond before work can continue:

Gate	What is approved	Target response time
Gate 1	Brand identity direction	Within 2 working days
Gate 2	First working preview of the website	Within 2 working days
Gate 3	Pre-launch review of the staged site	Within 2 working days

14.4 Timeline Extension

Delay Clause

Manhar Creatives will deliver this project within 2-3 weeks provided the client responds within the windows above and supplies content on time.

If the client is delayed in providing content, feedback or approvals, or in completing client-side actions such as the hosting plan decision, the OTP provider account, DLT registration or Google Business Profile verification, **the delivery timeline extends by the corresponding period.**

Delay on one gate delays every phase after it, because the phases are dependent. Manhar Creatives will confirm any revised delivery date in writing as soon as such a delay occurs.

15. Testing & Acceptance

15.1 Testing Performed Before Handover

Test area	What is verified
Functional	Every link, button, form, filter, search, cart action, OTP flow and WhatsApp handoff
Admin panel	Full CRUD on products, categories, jobs and blog; status updates; exports; notifications
Data	Enquiries and applications correctly stored, correctly emailed and correctly written to the Google Sheet
Responsive	Every page on real mobile, tablet and desktop devices
Browser	Chrome, Firefox, Edge, Safari and Samsung Internet
Performance	PageSpeed / Core Web Vitals against the Section 10.1 targets

Test area	What is verified
SEO	Meta tags, headings, alt text, canonicals, sitemap, robots and schema validation
Security	Form validation, rate limits, upload restrictions, headers and admin protection
Accessibility	Contrast, keyboard navigation, focus states and heading order
Content	Spelling, pricing accuracy, contact details and legal page presence

15.2 Acceptance Process

1. Manhar Creatives completes internal testing and deploys the site to a review URL.
2. The client reviews the complete site against this SRS: target response: **2 working days**.
3. The client submits a **single consolidated list** of corrections rather than scattered individual messages.
4. Manhar Creatives resolves every in-scope item on that list.
5. The site goes live, credentials and the handover pack are transferred, and a walkthrough session is conducted.
6. The project is deemed accepted on the client's written confirmation, or automatically 5 working days after go-live if no written objection has been raised.

15.3 Handover Pack

- Live website on alokplastics.com with SSL active
- Admin panel URL and administrator credentials
- Source code repository access
- Hosting, Cloudflare, database and email access
- Google Analytics, Search Console, Tag Manager and Business Profile access
- Google Sheet link for enquiries and applications
- Complete brand asset package and style guide
- Hero video master file and all product visuals
- A short written guide plus a live walkthrough covering how to add a product, publish a job, update content and read enquiries

16. Client Responsibilities and Content Checklist

The following must be supplied by **Alok Plastics** before the corresponding part of the project can be built. Related items have been grouped so the list stays short; each row may contain several pieces of information. A separate tick-list version of this section is issued as the **Alok Plastics Requirements Checklist**, which is the document to work from when gathering the material.

Single Document, Shared Folder

Please compile everything below into **one document** and upload it, with all supporting files (product photographs, industry logos, facility footage, team photographs, existing brand material), to a **shared drive folder** with edit access given to Manhar Creatives.

Information arriving in scattered messages across several days is the most common cause of delay. One organised submission keeps the 2-3 week timeline intact.

16.1 Company & Brand

#	What is required	Used in	Priority
1	Company basics: registered name, entity type, year established, owner or founder name and designation	Logo, About, legal pages, schema	First
2	Brand statements: mission, vision and tagline (if one exists)	About page, brand guide	First
3	Core values (4 to 6) and the short value keywords for the scrolling ribbon	About page, landing page ribbon	First
4	Company story: history, journey and key milestone years	About page timeline	Before design
5	Culture and working environment notes	About, Life at Alok Plastics	Before design
6	Unique selling propositions: what makes Alok Plastics different	Home, About, product pages	First
7	Market: industries supplied and the cities or states served	Copy and local SEO	First
8	Any existing printed material, visiting card or previous logo	Brand research	First

16.2 Products

#	What is required	Used in	Priority
9	All remaining product catalogues or the full product list	Catalogue, categories, filters, navigation	First
10	Category for each product, and confirmation of the proposed category structure	Products dropdown, filters	First
11	Commercial data per product: price, unit (pc / set / kg), product code or SKU, HSN code, packing quantity, minimum order quantity	Product pages, invoicing	Before design
12	Technical data per product: material and grade, sizes and variants, which equipment it fits	Specifications, filters, SEO	Before design
13	Selling content per product: short description, 3 to 6 key points, build quality and reliability notes	Product pages, SEO	Before launch
14	Real product photographs where available, and which products to feature on the home page	Product pages, home page	Before launch

16.3 Manufacturing, Delivery & Trust

#	What is required	Used in	Priority
15	Manufacturing: process stage by stage, machinery, equipment and technology used	Manufacturing section, hero video	Before design
16	Quality control process and any certifications held	Manufacturing, trust content	Before design
17	Business numbers: years of experience, industries served, cities served, products in range	Statistics band	First
18	Delivery: full dispatch process, timelines, courier or transport partners, freight terms, packing standard	Delivery section, FAQ, refund policy	Before design

#	What is required	Used in	Priority
	and damage-in-transit process		
19	15 to 20 industry or customer logos, with written permission to display each one	Industries We Serve section	Before design
20	Facility footage or photographs: machines, production, packing and dispatch	Hero video, About page	First

16.4 Contact & Digital Access

#	What is required	Used in	Priority
21	Business address exactly as it should appear, plus any branch or additional operating location	Footer, contact, schema, Google Business Profile	First
22	Phone numbers for sales, careers and support (state if the same number serves all three)	Header, footer, contact, career	First
23	WhatsApp Business number or numbers that should receive enquiries, and how they should be routed	WhatsApp button, enquiry handoff	First
24	Email addresses: general, sales, careers and support	Forms, footer, notifications	Before launch
25	Social media links: LinkedIn, Instagram, Facebook and X (Twitter)	Footer, schema	Before launch
26	Business working hours	Contact page, Google Business Profile	Before launch
27	Account access: Hostinger, domain registrar, and any existing Google Business Profile or Analytics property	Hosting, DNS, Google setup	First
28	Payment reply: bank or payment details to be shared on WhatsApp, and the greeting wording to be used	WhatsApp reply	Before launch

16.5 Career Content

#	What is required	Used in	Priority
29	Job openings to publish at launch, with full descriptions plus department, location, experience and employment type for each	Career page, job pages, filters	Before launch
30	Recruitment process, step by step	Career page	Before launch
31	Employee benefits and workplace highlights	Career page	Before launch
32	Life at Alok Plastics photographs, and the common questions candidates ask	Career page, Career FAQ	Before launch

16.6 Policies & Decisions

#	What is required	Used in	Priority
33	Review and approval of the Terms & Conditions, Privacy Policy and Refund Policy drafted by Manhar Creatives, including your refund conditions and timelines	Legal pages	Before launch
34	Company FAQ: the questions buyers actually ask you	FAQ sections	Before launch

#	What is required	Used in	Priority
35	Decision: hosting plan (Section 11.2)	Deployment	First
36	Decision: OTP route, SMS or WhatsApp (Section 7.3)	Login flow	First
37	Decision: approval of the WhatsApp message format and routing (Section 7.5.1), and confirmation of the buyer fields collected (Section 7.4.1)	Enquiry flow	Before design

Created by Manhar Creatives, not required from the client: logo and all logo variants, colour palette, typography, brand style guide, website copy, product descriptions written from client-supplied facts, blog articles, AI product visuals, hero video edit, meta titles and descriptions, FAQ drafting and the first drafts of the legal pages.

17. Project Exclusions

The following are explicitly **outside the scope** of this project unless separately agreed in writing and quoted.

Category	Not included in this project
Functionality	Online payment gateway, checkout or any card, UPI or netbanking collection (payment is manual by client instruction) · AI chatbot or conversational assistant (declined by the client) · Full CRM, sales pipeline, lead scoring or follow-up automation · Inventory or stock management, purchase orders and goods-receipt tracking · Automated invoice or quotation generation, GST filing or accounting integration · Dealer or distributor pricing tiers and login-gated price lists · Customer portal beyond the saved profile and enquiry history · Native mobile application for iOS or Android · Multi-language or multi-currency support · Third-party ERP or CRM integration beyond the Google Sheet sync · Live shipping-rate calculation or courier API integration · Automated outbound WhatsApp campaigns requiring the WhatsApp Business API
Services	Ongoing monthly SEO management, link building and content production after launch · Social media management, content calendars or paid advertising · Paid advertising budget of any kind · Professional on-site video shooting or product photography by a hired crew · Content or copy in any language other than English · Website maintenance after the support window in Section 18.1 · Training beyond the handover walkthrough and written guide
Costs borne by the client	Domain renewal and hosting subscription, including any plan upgrade required by Section 11.2 · Business email mailbox subscription, where applicable · OTP provider subscription, DLT registration and per-message charges · WhatsApp Business API charges, if that route is chosen later · Any paid third-party tool, licence, font licence or stock asset the client specifically requests

18. Post-Delivery Support & Change Requests

18.1 Post-Delivery Change Window

Two Weeks After Delivery

For **two weeks from the date of project delivery**, the client may request changes and updates at any time. Anything that falls **within the approved project scope** will be carried out at **no additional cost**.

If a requested item falls **beyond** the scope defined in this document, Manhar Creatives will say so clearly, explain why, and provide a separate estimate. No out-of-scope work is carried out, and no charge is raised, without the client's written approval.

Two rounds of revision are included per module within the approved scope, as stated in the quotation.

- Bug fixes arising from the delivered scope are corrected free of charge during this window
- Changes are requested through the process in Section 18.2
- After the window closes, support and maintenance can be continued under a separate arrangement

18.2 Change Request Process

1. **Compile:** the client gathers all desired changes into a **single document** rather than sending them one at a time.
2. **Submit:** the compiled list is sent to Manhar Creatives from the client's authorised email address.
3. **Review:** Manhar Creatives reviews the list and, within **2 working days**, confirms which items are in scope, which are out of scope, and the cost and timeline impact of the out-of-scope items.
4. **Approve:** the client approves or declines by email. On approval, the change becomes part of the project scope and this SRS is updated and re-issued at the next version number.

Scattered, one-at-a-time change requests are not processed individually. Batching them into a single submission is what keeps review efficient, keeps the record traceable and keeps the delivery date reliable.

18.3 What Counts as Out of Scope

In scope (no extra cost)	Out of scope (estimated separately)
Correcting a bug in a delivered feature	Adding a feature not listed in this SRS
Text, price or image corrections	Adding a new page type or template
Adjusting spacing, colour or layout within the approved design	A new design direction after design sign-off
Adding products within the delivered catalogue structure	Adding a payment gateway or an online checkout
Fixing a responsive or browser issue	Building a mobile application
Adjusting an existing form field	Building a CRM, inventory or invoicing module
Re-cutting the delivered video within two revisions	A completely new video concept

19. Commercial Reference

Commercial terms are governed by the quotation issued separately: **"Alok Plastics • Website & Admin System, prepared by Manhar Creatives"**. That document prevails on all pricing matters. The key terms are restated here for convenience only.

Term	Position
Scope	Six connected modules delivered as one project: brand identity, UI/UX design, development, technical setup and integrations, deployment and SEO, and the admin panel with product visuals
Pricing model	A combined one-time project rate. The scope is not available module by module at the package rate
Payment schedule	50% advance to start, 50% before live deployment
Revisions	Two rounds per module, within the approved scope
Delivery	2-3 weeks from advance payment and content handover
Domain & hosting	Already purchased by the client; not charged in the project price
Validity	As stated on the quotation

20. Risks & Mitigations

Risk	Impact	Mitigation
Client content arrives late or in fragments	Delivery date slips across every dependent phase	Single consolidated submission requested (Section 16.1); status tracked against the checklist
Hosting plan does not support Node.js	Site cannot be deployed as specified	Raised before development starts, with three options and a recommendation (Section 11.2)
DLT registration for SMS OTP is delayed	Enquiry flow cannot be completed	WhatsApp OTP offered as an alternative route; WhatsApp fallback built into the flow regardless
No real facility footage available	Hero video loses credibility	Client strongly encouraged to supply even phone footage; representative visuals used only with written consent
Remaining product catalogues arrive late	Category structure and filters may need reworking after design sign-off	Full range requested before the design phase (Section 2.2); admin panel allows unlimited additions afterwards
Product data incomplete at launch	Weak product pages and poor SEO performance	Products publish progressively; incomplete products stay in Draft rather than going live half-built
Approval gates not answered in time	Timeline extends	Response windows stated in Section 14.3; revised dates confirmed in writing
Scope grows during the build	Timeline and cost pressure	Change request process in Section 18.2, with in-scope and out-of-scope clearly separated
Logo permission not obtained for the industries section	Legal exposure for the client	Written permission required before any third-party logo is displayed
Search rankings expected too	Client dissatisfaction	Realistic expectation stated in Section

Risk	Impact	Mitigation
quickly		13; enquiries, not rankings, set as the success measure

21. Approval & Sign-Off

This document requires formal review and written approval from both parties before work commences. Upon approval, this SRS becomes the binding scope reference for the entire engagement.

21.1 Approval by Email Confirmation

1. An authorised representative of **Alok Plastics** sends an email to Manhar Creatives explicitly confirming acceptance of this SRS, quoting the document version number.
2. Manhar Creatives acknowledges receipt within **2 working days**.
3. On acknowledgement, this SRS is deemed formally approved.
4. The approval email is retained in the project record as the official sign-off artefact.

Client Acknowledgement

By sending the approval email described above, Alok Plastics confirms that the requirements documented in this SRS accurately represent the agreed scope of work, and authorises Manhar Creatives to proceed with the brand identity, design, development and deployment phases accordingly.

Any change requested after sign-off follows the Change Request Process in Section 18.2.

21.2 Record of Approval

	Alok Plastics (Client)	Manhar Creatives (Studio)
Name		Utsav D. Prajapati
Designation		Founder
Email		info@manharcreatives.com
Date		
Approval reference		

Next step: confirm this SRS by email, release the 50% advance, and upload the content pack described in Section 16 to a shared folder. Work begins the same week: brand identity first.

Appendix A: Product Catalogue Extract (Partial Range)

This extract covers only the one catalogue received to date and is not the complete product range. Further products are expected from the client. Reproduced exactly as printed in the client-supplied catalogue. Blank price or material fields indicate information not stated in that catalogue and required from the client. This extract is the source of truth for launch product data.

Product	Material	Size / Variant	Price
Adjustable Leg Insert	HDPE	Round & Square, 1", 1.25", 1.5", 1.75", 2"	Not stated
F-Bush (Display Counter Sliding Door Bush)	Nylon	Not stated	Rs. 10 / pc
Ventilation Jalli	PPCP	RS 60 (11" × 11")	Not stated
Ventilation Jalli	PPCP	RS 75 (14" × 14")	Not stated
Ventilation Jalli	PPCP	RS 80 (14" × 17")	Not stated
Ventilation Jalli	PPCP	RS 130 (18.5" × 10")	Not stated
Connecting Bush	Brass	2", 2.5", 3"	Rs. 200 / pc
Connecting Bush	Nylon	2", 2.5", 3"	Rs. 190 / pc
Handle Lock	Nylon	Durable, long lasting	Rs. 70 / pc
Bracket Handle	PPCP	3 inch	Rs. 15
Bracket Handle	PPCP	4 inch	Rs. 20
Bracket Handle	PPCP	5 inch	Rs. 30
Bracket Handle	PPCP	6 inch	Rs. 35
Float Valve	Nylon	Set	Rs. 180 / set
Waste Pipe	PPCP	Not stated	Rs. 20 / pc
Three Core Plug	Not stated	2.5 metres	Rs. 160
Three Core Plug	Not stated	3 metres	Rs. 200
Push Cocks (Light)	Brass	Anti-leak seal	Rs. 280 / pc
Push Cocks (Heavy)	Brass	Anti-leak seal	Rs. 300 / pc

Door Lock (Small)	Not stated	Not stated	Rs. 160 / pc
Waste Coupling	SS	Not stated	Rs. 60 / pc
L-Type Hinges	SS	Not stated	Rs. 95 / pc
Gasket	Not stated	Multiple types (images only)	Not stated
U-Type Door Spring	SS	Not stated	Rs. 100 / pc
PUF Chemical	Polyol & Isocyanate	Per kg	Rs. 270 / kg
SS Kabja 202	SS	3 inch	Rs. 24
SS Kabja 202	SS	4 inch	Rs. 32
L-Hinge Door Spring	SS	Not stated	Rs. 249 / pc

Product	Material	Size / Variant	Price
Bright Chrome	Not stated	Variant 1	Rs. 110 / pc
Bright Chrome	Not stated	Variant 2	Rs. 120 / pc

Catalogue contact details as printed: www.alokplastics.com · Phone **9915745414, 7479497003** · Address: **Industrial Area, Phase-2, Plot No. 6, Ramdarbar, Chandigarh**. Please confirm whether these are the numbers and address to be published on the new website.

Appendix B: Client Information Request Form

The full tick-list version of Section 16, laid out as a form the client can complete directly, is issued as a **separate companion document**:

Document	Alok Plastics Requirements Checklist
Issued with	This SRS, version 1.0
Contents	All 37 items from Section 16 as a tick-list, grouped by subject, with what each item is used for and when it is needed
Also contains	The four decisions required from the client, the list of items Manhar Creatives creates (so the client does not gather them), and the stage-by-stage plan of what happens after the checklist is returned
How to return it	One document plus all supporting files, in one shared drive folder with edit access to Manhar Creatives

Keeping the working checklist as a separate short document means the client can print it, tick it and circulate it internally without carrying the full specification. Both documents are issued together and describe the same requirements.

Appendix C: Document Control

Field	Value
Document title	Alok Plastics: Software Requirements Specification
Version	1.0
Status	Draft for Client Review
Date of issue	19 September 2026
Prepared by	Manhar Creatives, Visnagar, Gujarat, India
Prepared for	Alok Plastics (CHD), Industrial Area Phase-2, Plot No. 6, Ramdarbar, Chandigarh
Classification	Confidential, for client use only
Supersedes	None
Related documents	Alok Plastics Website & Admin System Quotation; Alok Plastics Product Catalogue
Next review	On receipt of client feedback or on any approved change request
