Our Story

Built on Manufacturing. Grown on Trust.

Established in **1998**, Alok Plastics began its manufacturing journey with a simple belief: good products build business, but **trust builds long-term relationships**.

Starting with a focus on serving industrial and B2B customers, the company gradually grew through consistent manufacturing, dependable service, and an understanding of what businesses truly need from a manufacturing partner — **quality, competitive pricing, reliable supply, and timely delivery**.

Over the years, Alok Plastics expanded its capabilities and customer reach across India. Today, we manufacture plastic components using moulds and plastic granules and continue to serve businesses across the country. With **20 crore+ products successfully delivered and ongoing**, our journey reflects the trust our customers have placed in us.

But our journey is far from complete. We are continuously working to expand our production capabilities, create more employment opportunities, adopt responsible manufacturing practices, and build partnerships with leading companies in India and global markets.

For us, growth is not only about producing more. It is about **building better products, stronger relationships, and lasting trust**.

Plastics, Steel & Trust
Crafted from Bharat, Built for the World.

Our Journey

1998 — The Beginning

Alok Plastics begins its manufacturing journey with a focus on serving industrial and B2B customers.

2000s — Building Customer Relationships

The company grows through consistent manufacturing, reliable service, and long-term customer relationships.

2010s — Expanding Reach

Alok Plastics strengthens its manufacturing capabilities and expands its customer base across different parts of India.

2020s — 20+ Crore Products Delivered

The company reached the milestone of **20 crore+ successfully delivered products**, with deliveries continuing.

Today — Serving India

Alok Plastics continues to serve B2B customers across India with plastic and steel products, focusing on quality, reliability, and trust.

The Future — Expanding Production

The next phase includes plans to **expand the production house, increase manufacturing capabilities, and serve growing customer requirements.**

Work Culture

Culture & Working Environment

At Alok Plastics, we believe a strong company is built by strong people. We aim to create a **Joyful, Supportive, and Trustworthy** working environment where every team member feels valued and respected.

Our work is driven by a collaborative team across different functions:

- **Skilled Product Development Team** — Working closely with our factory operations to develop and improve products.
- **Sales Team** — Building customer relationships and expanding our B2B reach.
- **Social Media & Marketing Team** — Strengthening our brand presence and connecting with new audiences.
- **Tech Developers** — Supporting technology, digital systems, and the company's growing digital needs.

We encourage teamwork, learning, responsibility, and continuous improvement. We believe in giving people opportunities to develop their skills, take ownership of their work, and grow alongside the company.

As we expand, our goal is to build not just a larger manufacturing business, but a workplace where people enjoy working, grow together, and take pride in what they create.

What Makes Alok Plastics Different?

From Requirement to Repeat Supply.

We don't just manufacture plastic components—we build reliable, repeatable supply partnerships.

Understand → Develop → Manufacture → Supply → Repeat

Our USP

**“We don't measure success by the order we deliver.
We measure it by the orders that keep coming back.”**

Industries you supply,

Alok Plastics

Industries We Supply

Built for the industries that build India.

We manufacture plastic components for a diverse range of B2B applications:

OEM & Manufacturing

Components for OEMs, production lines and manufacturing businesses.

Engineering & Machinery

Parts for industrial machinery, engineering products and equipment.

Automotive

Plastic components for automotive and auto-component applications.

Electrical & Electronics

Components for electrical products and industrial electrical applications.

Gas & Kitchen Equipment

Components for gas equipment, commercial kitchens and related products.

Agriculture & Equipment

Components used in agricultural equipment and machinery.

Packaging & Specialized Applications

Components for packaging systems and specialized industrial requirements.

Pan-India Dispatch

From Chandigarh to every corner of India.

From a single component to thousands of parts for a production line — we manufacture for businesses that build.
